Thread: [\[TUT\]How to know if a file is backdoored](#)

CybexAlpha - May 13, 2015, 3:22 pm

Hey guys this tutorial is for you that is starting in this world and dont know how to see if a trojan client or crypter is backdoored,remembering its a basic tutorial for noobies and is not 100% efficient and ,sorry my bad english i'm brazilian

link video: [youtu\(dot\)be/8pPco3c-Ye8](http://youtu.be/8pPco3c-Ye8)

the tools are in the video description all from official websites

Sennheiser - May 13, 2015, 3:24 pm

or,

if you want to do it the safer way

upload it to malwr.com

and when you do, it gives you good analysis on the file

Spoxaros - May 13, 2015, 3:30 pm

thank you ! but the methot from sennheiser is better

CybexAlpha - May 13, 2015, 3:31 pm

Here is the video.

FeintHF - May 14, 2015, 10:56 am

Thanks for the share! i've been ratted for Steam items before, it sucks lmao

KaliKid - May 15, 2015, 12:34 am

its a good tut but sennheiser's is better!

Comedic - May 15, 2015, 9:15 am

Great tut for beginners ?

Mcbride - *May 15, 2015, 10:24 am*

Watching this on my mobile device. Posting so I can access it later on my PC. Thanks for the help
