Quote:I can vouch for the quality of this users services. Legit guy and SUPER knowledgeable. He helped me fine tune my game with different strats and positions that i havent even thought of. Im not the best player(MG2), but he knows a ton, so its easy for me to adapt to the playstyle. I completely recommend this guys services 10/10. would buy again. (~Chester~)

For the record, OP AVERAGES ~11 RWS. It's not bad but don't go around claiming you average a 14 RWS

Oh hey what do you know. I was highly suspicious after I saw say he went from DMG to "14 RWS/110 ADR" in just 6 months so I did some research. He's a cheat.

His MPGH Account ([Click to View](#))

Him telling someone a hack isn't VAC Detectable ([Click to View](#))

Proof it is infact him for good measure ([Click to View](#))

And the coup d'etat, him straight up asking if a hack still works ([Click to View](#))

your completely taking everything out of context. its like reading only the last sentence of a contract. it has 0 validation towards the broad scope. you walk into peoples threads trying to dox them for some reason and take everything out of context i dont think he would like you trashing his thread.

the whole vac thing is probably from when he was new and needed a recoil reducer? you cant tell me you havent tried it when you were new. you need to do some research before trashing peoples thread.

is it wrong for him to be a member of mpgh? is it wrong for him to post in a thread providing insight into how someone will get banned from using it? provide the whole scope of the thread pls.

I wasnt telling him it was not vac detectable, the thread said it was undetectable and I was bashing the post by saying the people using this will get overwatched anyway . Do you even read?

Also the reason I got good n 6 months is a played my first open season with people capable of playing esea main and I learned a lot from it and thats how i developed my game-sense. I got bashed by the french people every bad thing i did and I learned from it. I also only play cs:go and have almost 3k hours and an almost \$160 inventory. I've also been playing on-client for over a year now. I have invite players on my friends list and many main players also. I'm also good buds with Agm thats played premier for like 7+ seasons
