Thread: [TESTERS NEEDED | tintCrypter v2 Progress Thread | Changes | Suggestions](#)

debug - May 13, 2015, 7:20 pm

Need a few testers. PM me.

Hey all,

This thread will serve as the progress thread for the work I'm doing towards tintCrypter v2. This will mainly server to inform current customers or potential customers who may have feedback and or suggestions.

tintCrypter v2 GUI

What's new?Near-complete recode

Manage Settings (Save/load)

Avast! DeepScreen bypass. (Doesn't require any options to be enabled.)

Improved hidden startup method w/ customizable options

Improved process persistence

Run MessageBox once

Test messagebox

Automatically scan after compilation

Help section - answers FAQ's

Incredibly secure client. If anyone feels they can crack it, PM me. (NOTE: This isn't just some netseal + variables.)

What's left to doImprove USG - Make it more randomized, hopefully thwart quick ESET detections.

Further improve process persistence (prevent process closure)

More binder options (custom file name if dropped)

Stability and bug testing. (Always being done, but final process needs to be done at the end)

??

I'm asking you all, preferably current customers or potential future clients, to suggest to me options that you want added or think would be useful. Keyword: useful. Please don't suggest garbage options, or "lol .net is shit gtfo."

I'm looking for serious replies only.

Thank you,

debug

Dulio - May 13, 2015, 7:29 pm

Well what is the stub coded in?

VB.NET?

debug - May 13, 2015, 7:31 pm

(May 13, 2015 07:29 PM)Psycho? Wrote: [\[CITE\]](#) Well what is the stub coded in?

VB.NET?It's coded in c#. But yes they are compiled essentially the same.

DuguWudi - May 14, 2015, 10:09 am

Is there antikill feature, eg when someone kill it, it prompt access denied/etc

and will there be a antisuspend feature?

Dont to forget system wide injection?

Thanks.

Raymond Reddington - May 14, 2015, 10:10 am

Looks like a great Crypter. I will watch out for this one.

debug - May 14, 2015, 11:45 am

Antikill is technically process persistence, but the access denied prompt requires admin so I will probably not add that.

I had systemwide injection but it was buggy. I will see about bringing it back.

Probably won't be an anti suspend feature simply because I don't see that as being an issue all that often, and would likely cause more problems than it fixes.

stdio? - May 14, 2015, 12:11 pm

What's the injection routine like?

Incredibly secure client. If anyone feels they can crack it, PM me.

Probably some joke bruteforce routine which can easily be dumped from memory.

Further improve process persistence (prevent process closure)

Have fun doing this in .NET

xeonx - May 14, 2015, 12:13 pm

Got any eta on release date? I've heard some positive feedback on v1 :)

Let me now if you need any beta testes/vouch copy :)

OfficialNutty - May 14, 2015, 1:10 pm

Interested on the ETA on the release date.

debug - May 14, 2015, 4:53 pm

Probably some joke bruteforce routine which can easily be dumped from memory.

Further improve process persistence (prevent process closure)

Have fun doing this in .NETThe injection used is self-injection.

Not "joke bruteforce." And no, cannot be dumped from memory.

As for an ETA, I don't really like to say because if I don't meet that date it's disappointing for everyone involved.

Thanks for the information, so now I only got two product choices for antisuspend feature, one is already in market and one still haven't even in market yet. Anyway, thank you.

debug - May 20, 2015, 6:19 pm

Need a couple beta testers. Upgraded members only.

Anti suspend is not useless. Cryptex uses it in ones of the types of persistence.

Just manage it carefully and it will work wonders.

DuguWudi - May 20, 2015, 6:41 pm

I didn't notice Cryptex have antisuspend feature.

Can show a video of it in action?

Thank you.

Thank you.As killamuvz advised me, I will be adding anti-suspend within the persistence as well.

DuguWudi - May 20, 2015, 7:43 pm

Good, I thought you give up the idea of it.?

Cecilia - May 21, 2015, 6:55 am

Can vouch for killer security.

Good luck with your beta testing.

debug - May 21, 2015, 9:02 pm

Need a few testers. PM me.

salmonesus - May 22, 2015, 7:16 am

lol nice drop shadow

sooooooop bLaZeD

The Scarabian - May 22, 2015, 1:12 pm

I am helping debug with his crypter, I am sure it will turn out to be very nice.
