Thanks, I'm hoping to find a group here that doesn't revolve around dumb shit like RATs and doxing/DDoS :p

It seems everything either involves that kinda stuff, or involves stuff that isnt related to security (i.e. marketing etc)

We're looking to recruit, but we started out as a doxing group.

I see what you mean though, I personally have never RAT'd anybody because it's really pointless.

I have the ability to dox and have doxed some high-profile figures in the hacking scene in the past, but it really just doesn't appeal to me anymore.

I'm mainly around here to learn, I don't like doxing unless I feel I need too lol.
