Thread: [JuazeyCheats \(www.JuazeyCheats.com\) Is a SCAMMER \(PROOF\)](#)

Swizzi00 - May 14, 2015, 3:01 pm

JuazeyCheats is a scammer here on HF, and yes i got proof

1. everyone is getting the same hacks, the proof is from his site <http://prntscr.com/75a8ar>

> I bought hacks from different websites and always get banned within hours or days- now I'm afraid, is your hack really undetected?

Yes it is undetected, (i'm selling unique hack build per customer for maximum safety.) That said, if any bans happen, it's your own responsibility.

> How do I get the cheats after Purchase?

It is actually very easy. Once the purchase has been complete, (you will be generated a download link.)

he answered me this "They are all obfuscated make them undetected :)" <http://prntscr.com/75a67a> obfuscating does almost nothing for undetectability, as in the end it turns into machine code and the signature remains the same

it just encrypts string, renames functions, sometimes encrypts resources

2. And on skype his bot answere you like this <http://prntscr.com/75a7gw>

> For the BF4, CS:GO, CSS, H1Z1 Hack, War Z, Planetside 2, GTA V send 5 euros to lolilol02@hotmail.fr on PayPal as friend or family (so you don't have to pay the fee), you will get the file one minute after you paid)

He say send the money as friend or family and you wont pay the fee, well that is shit talking, if you send the money you will pay the fee, so what i'm saying right now he is a scammer!

The profile of the guy: <https://hackforums.net/member.php?action=profile&uid=2601706>

And his thread <https://hackforums.net/showthread.php?tid=4712531>

And the site www.JuazeyCheats.com

No he isn't.

You're getting exactly what you paid for, 5-10€ lifetime horse shit.

Now with all seriousness, this shouldn't be on deal disputes but rather on Marketplace Discussions as a Community Alert instead.

Code He say send the money as friend or family and you wont pay the fee, well that is shit talking, if you send the money you will pay the fee, so what i'm saying right now he is a scammer!

So saying that automatically makes him a scammer? Yeah right....

And read this will ya:

Code It's free within the U.S. to send money to family and friends when you use only your PayPal balance or bank account, or a combination of their PayPal balance and bank account. There is a fee to send money as a personal payment using a debit card or credit card.

So he is right about sending to friends

well some people is not from US right?

so they will pay the fee, why can't he just tell them everything before they pay?

Do you really think he give different hack? i wont belive that

Yes true, idk you should consider it to him to tell them everything. Well idk about if he will give cause im a legit gamer w/o the need for hacks xD

Swizzi00 - May 14, 2015, 3:16 pm

(May 14, 2015 03:15 PM)Toxyiic Wrote: [\[CITE\]](#) Its also free in EU.

(25 characters.)

No it's not, i live in EU and i always pay the fee

YesHax - May 15, 2015, 1:18 am

You get what you paid for, a 5 euros copypasted garbage. It's your fault paying for it and expecting everything to be true.

Because for him it makes no difference, whether if he scams 10€ or 5€ he still makes the money. He has no pride in the cheats because they aren't really made by him. On the end he still made 5€ with zero effort.

yeah that's true but still, people need to know what shit he is

suknaman - January 16, 2016, 3:02 am

Yep (y) Vouch for OP , its true he is scammer!

Jimmie - January 16, 2016, 3:11 am

I wouldn't be shocked if this was true most of these new cs:go hacks are leaked source code.

Find the guy that sells Hexui here. It's what I use and it's deadly. Undetected for like a fucking year or something..

There was just a topic @ csgo section about being cracked by suicide squad or something.

Not sure if real, however keep it in mind that if it is real then it most likely be detected within a short time.

Just a friendly warning?
