Thread: [Dork to find Radio Station Websites](#)

SiStemiC - May 15, 2015, 7:09 am

I just found this. By searching: PHP Code

```
<?php
```

```
"fm:/.php?id="
```

You get Radio Station Websites. I did a small vulnerability test on one site:

Code 9XXbigfm.com/city.php?id=2

XX= 16 + 11And it was vulenable.

Anyway, the site has 1 collumn(!) and theres a table called User_login. However I stopped there and thought about sharing it here in case someone is interested...

Did you upload shell to the site?

andy1994 - May 16, 2015, 3:11 am

Thanks man good find for sure :)

qusai.alhaddad - May 16, 2015, 3:35 am

I cannot post pictures now , but you know what is "hue".

I can't even get the admin page to load. It just gives me a 403 Forbidden.

Anyway to get past that?

They must have deny all in htaccess :D

The password was easy to get. it was huehuehuehue Or maybe only 3 I do't remember :3

Lol so does that mean they patched the admin folder so only authorized people can access it now? I'm not real smart with web files :P but I have an understanding for most of it

May be some one who Got the access :3 Have deleted it ... but not his backdoor ?

SiStemiC - July 1, 2015, 6:50 am

After some investigation the admin page seems to be Code `http://9XXbigfm.com/siiya/login.php`
`XX=16+11`

sysadmn - July 12, 2015, 4:09 pm

epic ... leme try this one

PirateSec - July 12, 2015, 4:11 pm

So i was searching with that dork. This came up as one of the speakers
<https://gyazo.com/882a014922419cf9d8e39d27308ed239>

bass booster - July 12, 2015, 4:34 pm

Lol I tried to go on the site, I got

"Could not connect: Host '206.183.111.28' is not allowed to connect to this MySQL server"
