Thread: [\[Tutorial\]Making Fat Icons Thinner \[Perfect for Flat Thread designs!\]](#)

Purest. - May 15, 2015, 10:38 am

Load your image into photoshop most websites will give you a smart object image which I have, Make sure that the background is transparent.(just delete the background layer)

Spoiler [\(Click to View\)](#)

Now hover your mouse over the layer of the logo, now hold ctrl or command on mac and click on it to make a selection

Spoiler [\(Click to View\)](#)

After you've done that just go to select in the menu and now click on modify and click contract

Spoiler [\(Click to View\)](#)

Now you can set the amount of pixels you want the logo to become thinner, for me I am gonna go with 100, you can choose anywhere from 30-200 :D

Spoiler [\(Click to View\)](#)

Now your gonna see a selection on the logo, right click on the logo layer and rasterize it, if your logo already was not a smart object you dont need to do this step.

Spoiler [\(Click to View\)](#)

Now just do ctrl+j or cmd+j on the selection while selected the logo layer which is rasterized, now you will see a new layer on top of the original layer, just delete the original layer and Viola!

Spoiler [\(Click to View\)](#)

Hope I was able to help this community and teach a few tricks!

Thanks! ?

Comedic - May 15, 2015, 10:41 am

Not sure if it's me, but your picture's are dead!

Aiba - May 15, 2015, 10:42 am

All your images are broken

Purest. - May 15, 2015, 10:53 am

Just fixed em, let me know if it works for you!

Hulk - May 16, 2015, 1:22 am

Only 1 image is working...

Royal Crowd - May 16, 2015, 1:24 am

No images are working for me except the 4th.

Have a nice day! ?

Np bro, Even I didnt know this trick !

Hulk - May 16, 2015, 5:17 am

Did knew this but never actually used it, I can't see why but thanks for the detailed guide! Sure
someone will have a advantage of this.

nicorec - May 16, 2015, 10:24 pm

Thanks for sharing!!!!!!

np bro, hope you learned a thing or two from this

pissedaf - May 21, 2015, 6:19 pm

you need to space them together again too

Purest. - May 22, 2015, 2:19 am

That really depends on the type of icon you use, its not hard.

-Rarity- - August 6, 2015, 6:08 pm

Thanks for the tutorial bro nice joob .

FrankieDickhard - August 7, 2015, 5:46 am

nice tut my man,thank u a lot

grady - August 8, 2015, 9:17 am

Oh dang, I had no idea the contract command was there.

MrJamieMcC - August 9, 2015, 1:02 pm

Didnt know you could do this. Thanks :)

-nil - August 9, 2015, 9:38 pm

The images seem to be working for me, but nice tutorial!

Gnome Kek - August 11, 2015, 4:28 pm

Great trick for people who are starting out!

Band1to - January 8, 2016, 11:33 am

Thanks for sharing OP. Never knew about this
