The Bot also includes a really nice and easy tutorial, you will understand the Program fully after you completed the tutorial. It come's with a pre-made script, but you can add whatever you want to the script or even make your own so it gets as custom as you want.

What would be really nice is some more pre-made scripts, but further I have nothing to complain about.

Big Vouch for this product and I can recommend this to anyone!

For a good script i would recommand you create you'r own. Is super easy to create.

About methods , there are many methods you can use. Some example : Autopilot ewhoring , rat spreading, PPI, URL Shortener. You can even combine them

Example : Upload you'r rat on a PPI network , and use URL Shortener for link. Now all you have to do is to promote your "free video chat" app and you will earn from URL Shortener , PPI and also rat spreading.

Is up to you to choose the most suitable method for you.

One of the best methods to spread via skype.

SlinkyMate - November 15, 2015, 8:21 am

Just purchased. Firstly, the e-book he included how to set everything up is very detailed explaining every single feature in the tool. Secondly, the tool UI is very sleek, easy to find your way around the tool without no complications. The default pack which comes with the tool pretty much includes every single message you could think of so you don't really need to add a desperate amount of messages. SoFt is also a very nice guy, I added him on skype asking for some help, he provided me with the information i needed to know. He also gave me an e-book which he's going to release pretty

soon because I bought his tool. So I got more for what I asked for, his customer service is great. All together the tool works flawlessly. If you're looking for a skype bot this is the one! :D

This looks like it's incredibly worthwhile. The reviews seem positive and I'm just jizzing over the possibility of getting this. Posting to come back when I got some money floating around, just paid servers and everything. :/
