Thread: [hacking index.html](#)

masterhacktivist33 - May 15, 2015, 1:06 pm

can anyone show me a tutorial about hacking the index of a website,a simple one,or at least some tips :3
thanks in advance!

Hum not sure what you're trying to accomplish here sir. What would you be able to do with no server side ?

05317832892 - May 15, 2015, 1:53 pm

What on earth are you talking about? Be specific, do you want to hit off the website or change it or see the database?

R3b00ted - May 15, 2015, 7:47 pm

In order to help we need to know what you want.
If you want to see the source of it?
Hit ctrl+u in Chrome. OR hit ctrl + s to save the page.
"Hacking the index of a website" wouldn't really do anything, even if someone were to decrypt the language you speak.

???if? - May 15, 2015, 7:51 pm

How does one simply hack index.html? You must be an Anonymous member, just don't hack me :O

The dark hat - May 15, 2015, 11:02 pm

Do you want to deface(change the layout) the website by saying that hack index.html?

Viktory - May 16, 2015, 12:13 am

He's talking about defacing the website.

You will need to have a shell on the server the website is hosted in to do that.

If you have no idea what I'm talking about it's time to learn.

UMNO - May 16, 2015, 1:43 am

do we need ftp login to hack index.html?

Dmitriy - May 16, 2015, 1:45 am

How do those kids come up with such usernames? Lol master hacktivist. Is that some new haxxor shit?
