Thread: [Does Cryptolocker still exist?](#)

Larsenpower - May 16, 2015, 7:30 am

I was wondering, if the CryptoLocker malware still exists? It's been a long time ago since I've heard of someone infected with it?

Does anyone know, does it still exist?

CryptoLocker servers we're seized by various law enforcement agencies. The actual malware exists still, but the keys are now available for decryption.
