Thread: [\[NEW\] \[Get WiFi Passwords\] \[FREE\] Advanced Wifi Analyser \[UPDATED V3 FIXED BUGS\]](#)

Martarts - May 19, 2015, 6:17 am

I decided to code a quick and easy way to get WiFi passwords and view ALL the network stats. I am bringing it to you free! I coded it 100% in batch and converted it to an exe file. It NEEDS admin privileges to use the commands.

Note: Password is under security section labeled "Key Content"

Updated V3 Fixed Program Closing

Download NEW V3:

http://www.mediafire.com/download/shdm8s0aa78bf5m/Advanced_WiFi_AnalyserV3.rar

I deleted the outdated version because too many people where downloading it. Updated link above

VirusScan:

<https://www.virustotal.com/en/file/4d812a9f39345f871f191fe06053f7b5c1ac06d4f3cfc484a0088a989f59140/analysis/1432068045/>

Updated Virus Scan. Less Detections!

Has false positives

If you want the program that does not check for admin privileges pm me. You still need admin rights for it to run though.

Your Welcome!

SIM-2263037 - May 19, 2015, 6:53 am

Can anyone vouch for this?

Edit- doesnt work just closes after asking after administrator rights, even if you open it with administrator rights

Martarts - May 19, 2015, 7:29 am

(May 19, 2015 06:53 AM)MrHamKiller Wrote: [\[CITE\]](#) Can anyone vouch for this?

Edit- doesnt work just closes after asking after administrator rights, even if you open it with administrator rights

Right click exe and click run as administrator. Then when prompted click yes. It works for me fine, I will put up another link just incase.

So many leechers!!! 34 downloads and only 1 comment. If people don't start commenting I will make it pm only.

Comedic - May 19, 2015, 7:55 am

You won't be able to make it PM after because you won't be able to edit your thread. :P

Villand - May 19, 2015, 8:04 am

lol it just show the wifi that u are connetced

sorry for my eng

Thief. - May 19, 2015, 8:08 am

Going to try this out, +rep if it works :)

Martarts - May 19, 2015, 8:13 am

Just as a heads up the WiFi password is under the security section of the wifi.

supahDupahMen - May 19, 2015, 8:21 am

It doesn't work :(It just flashes and closes..

Villand - May 19, 2015, 9:06 am

(May 19, 2015 08:21 AM)supahDupahMen Wrote: [\[CITE\]](#) It doesn't work :(It just flashes and closes..
did u run it as adminstartor?

LogoiLab - May 19, 2015, 9:08 am

A batch file triggering a false positive? Highly unlikely. I'll stick to my PowerShell oneliner that does this for me.

L?YLE - May 19, 2015, 10:55 am

Does not work if I do rightclick>open as admin>yes

It sais still that I have to open it as admin! When this works +rep

Cammy - May 19, 2015, 10:59 am

i aint clicking that shit until you post the batch code

Davy - May 19, 2015, 11:13 am

Seems VERY sketchy OP. No offense but I will download it once somebody has checked it out.

HyperKut - May 19, 2015, 12:41 pm

Very good job man ! It's beautiful !

Squadie - May 19, 2015, 1:05 pm

false alert? it say this is an virus

HyperKut - May 19, 2015, 1:24 pm

Very good job man ! It's beautiful !

Squadie - May 19, 2015, 1:28 pm

(May 19, 2015 01:24 PM)HyperKut Wrote: [\[CITE\]](#) Very good job man ! It's beautiful !
u tried it Hyper? i bet u just some fake user

Martarts - May 19, 2015, 1:39 pm

New Updated version!

Fixes:

Crashes

Instant Closing

Download:

http://www.mediafire.com/download/6sfmh5n96n8pxuc/Advanced_WiFi_AnalyserV1.2.rar

I removed some of the code so it won't auto-close It reduced the viruses!

VirusScan:

<https://www.virustotal.com/en/file/4d812a9f39345f871f191fe06053f7b5c1ac06d4f3cfd484a0088a989f59140/analysis/1432068045/>

Your Welcome!

PanicPro - May 19, 2015, 1:51 pm

Thank you very much! At least someone likes it

oweet - May 19, 2015, 3:59 pm

Just for anybody wondering, this doesn't crack WiFi passwords. It just finds the saved password that you already entered in the WiFi settings on windows.

Martarts - May 19, 2015, 4:26 pm

(May 19, 2015 03:59 PM)oweet Wrote: [\[CITE\]](#) Just for anybody wondering, this doesn't crack WiFi passwords. It just finds the saved password that you already entered in the WiFi settings on windows.

Works good when your at a friends house or forget your WiFi password. I used it at staples when i got my laptop xD. Btw V3 is out.

Cammy - May 20, 2015, 3:13 am

post the batch code dude nobody will use it otherwise

Martarts - May 20, 2015, 3:27 am

(May 20, 2015 03:13 AM)???2k??? Wrote: [\[CITE\]](#) post the batch code dude nobody will use it otherwise

Why would I do that? Just for people to take the code.

If you don't want it don't get it. Run it in a Virtual Machine or Sandboxie if you feel the need too.

Villand - May 20, 2015, 6:45 am

it just gives u the user who u are connetced

P???ce - May 20, 2015, 10:13 am

Would love to get that other one, does it scans computer/laptop for any previously entered/remembered passwords?

Mrprincexx - May 20, 2015, 11:54 am

Thnkas you so much man ! :)

Martarts - May 20, 2015, 12:08 pm

(May 20, 2015 06:45 AM)Villand Wrote: [\[CITE\]](#) it just gives u the user who u are connetced

Yes it scans for every single network that the computer has connected to. So lets say you got wifi at

a friends and then came home downloaded this program and opened it, you could see THEIR password including all the other passwords you have entered.

rachelew2012 - May 20, 2015, 12:09 pm

gonna try this out, ill +rep if it works

Dickface - May 20, 2015, 12:11 pm

I'll check this out when I get home.

Inixxonl - May 20, 2015, 12:29 pm

I will try it soon . its good if you forget a password of wifi you connected before . sorry for bad English .

konridi - May 23, 2015, 10:25 am

good job m8 i r8 8/8 and masturb8

.Jarin. - May 23, 2015, 11:01 am

Yeah, useful at home. Would be even more useful if I knew how to make this work from connected Android device. Is it possible? Its often not my laptop that goes to friends house and really wouldn't like to do sketchy things like connecting my pen-drive to his to just run this batch file. Asking him again for it sounds less embarrassing.

Martarts - May 23, 2015, 12:28 pm

(May 23, 2015 11:01 AM).Jarin. Wrote: [\[CITE\]](#) Yeah, useful at home. Would be even more useful if I knew how to make this work from connected Android device. Is it possible? You could make an app (.apk) from something like android studio but I don't know how and what language you can use for android.

Thats your problem. Why post if your not gonna download it. You can ask any actual "Upgraded Members" who download unlike yourself. 483 downloads.

Thanks guys :)

LogoiLab - May 26, 2015, 7:16 am

Here's some code:

Code netsh wlan export profile key=clear

That does exactly as op says... Run it in an admin command prompt... Don't trust this guy he's out to infect... Just use this command.

Lifestyle - May 26, 2015, 7:28 am

Its legit, and worked. Thanks m8. Don't know why everyone is being so negative about it.

Shisui Uchia - May 26, 2015, 12:21 pm

Amazing tool, I was able to find all previous networks I was connected to and the passwords for all of them! I do have a question however, can you do this to networks you have not connected to before, because I might be having trouble using that feature. Kudos!

Martarts - May 26, 2015, 12:25 pm

(May 26, 2015 07:16 AM)PentestingForever Wrote: [\[CITE\]](#) That does exactly as op says... Run it in an admin command prompt... Don't trust this guy he's out to infect... Just use this command.

Lol im "Out to infect" you cant say ANYTHING with you -12 rep. Better work on that! I have pos rep and if you don't want it don't download it. I hate people like you who take away from the people who are trying to do good for the community. I thought it was nice to release FREE stuff that I coded for you guys. I already have over 600 downloads. Think before you post next time!

Evanescence - May 26, 2015, 12:33 pm

You are just trying to infect people. You can't just hack a wifi network with command prompt. You need to get a WPA handshake, convert the cap file to hccap, then run it through hashcat or something. The closest thing to hacking wifi with command prompt is export the wifi networks that

the computer has saved for automatic connection.

EDIT: Also, rep doesn't mean that he's not trustworthy or that you are trustworthy. Rep is just people's opinion of you.

Martarts - May 26, 2015, 12:38 pm

THIS PROGRAM DOES NOT HACK WIFI! It analyses connections you have connected before. All it does it check system info for saved wifi passwords. Why don't you actually do some research. I am not out to infect. CHeck the positive reviews. If you don't want it don't download it. I am trying to HELP. There is NO virus on this ask anyone who download it. It runs with ALL AV ON.

LogoiLab - May 26, 2015, 1:32 pm

I reverse engineered your executable... It was created with Iexpress and contains a malicious include... It only exports the wlan profile... Just like my example... Please only use the command I posted as this program is infected... And OP check my sig... I contribute... And I contribute REAL... AND UNINFECTIOUS programs that function. I also give people the SOURCE CODE so ya... Call me what you want but don't be a little shit to people because they can see right through you.

Xenious - May 26, 2015, 1:56 pm

ty for share :) going to try

ByToxic - January 30, 2016, 7:32 pm

Thank you for sharing. I will try it later.

Martarts - January 30, 2016, 8:08 pm

No Prob! Made this a while back. The false positive is not from the actual code. It's from the Bat2Exe I used. It does it to all my Bat2Exe's. If you feel it's unsafe then don't download. Simple as that. If you want me to make something for you pm me. I'll do it for free.

vouch from a person with 7 posts haha .

Martarts - June 13, 2016, 6:23 pm

I will soon make an actual program that does this and has more tools in the near future. Working on it now. It's been almost a year since I started this. Cool to see how many downloads and positive feedback.

xXPhoenixXx - June 18, 2016, 5:43 am

Holy shit it works I hacked my wifi and I saw my wifi password yo bro thank you so much :

Trivexlium - June 18, 2016, 5:47 am

This looks like wireless profiles that would be stored within windows, not from what your device is seeing, you can edit the settings and view the password. Which you can actually do without this batch file in windows itself.. I do not recommend downloading this at all. Hacking wireless networks are not a 2 step process. Unless using wifite on WEP and Pixie on WPS. (If vulnerable).

Martarts - June 21, 2016, 3:23 pm

I wouldnt consider this a hacking program. Just a program that reads hidden files. Viewing files ca be a 2 step process. Maybe if you actually looked at the program you can see this. This program makes things easier. Why do people hate on something that works and has been working with NO reported problems.

Apexeus - June 21, 2016, 3:24 pm

This isnt helpfull at all.

axilles - June 22, 2016, 5:41 am

fake bullof shiiiit lol dont download ????

sec222 - June 22, 2016, 8:59 am

working nice in win 10.thanks man

VoxelGG - June 22, 2016, 9:42 am

Nice program, works great!

eric2221 - June 22, 2016, 10:50 am

This looks amazing! Thanks for sharing OP!

Trivexlium - June 22, 2016, 2:44 pm

Don't like it because of false statements. All this does is grab passwords from Windows from what it seems. Which the user downloading this program should already know.

SheepOverLord - June 23, 2016, 5:26 pm

looks cool ill check it out thanks

BaileyJP - June 24, 2016, 2:19 pm

Yeah, for the people that it just flashes and closes, just right click it and click RUN AS ADMINISTRATOR

yev - June 26, 2016, 11:13 pm

looking good ill test it on my school

Sednnie - July 18, 2016, 12:15 am

where's the link please can i get the tools that you used??

Dark- - July 18, 2016, 8:20 am

Read the thread before posting..

mark9095 - July 22, 2016, 12:47 pm

Thanks dude will try it later

MrSpecter - July 27, 2016, 1:48 am

Thanks to see bro it's cool !

x6NsR - July 27, 2016, 11:11 am

love you, u solved my problem lol

Martarts - April 14, 2017, 10:03 am

Glad I could help anyone who wanted something like this! I just checked the download link and its still up and running aswell as the virus scan!

?ictor? - April 14, 2017, 10:43 am

Looks good :), Good luck with that software

CapsLuck - April 14, 2017, 11:08 am

I'll try this out and get back with some feedback.

roimain744 - April 14, 2017, 11:49 am

Thanks you its cool bro !

Martarts - April 23, 2017, 4:29 pm

Mickeymonroe - April 25, 2017, 11:32 pm

thanks mate how many posts do i need to download

davidgale100 - April 26, 2017, 10:07 pm

is it crack? its so much lengthy procedure. twin evil attack is best that I know

Kokolol99 - May 2, 2017, 2:33 pm

Not trying to be a cock but anyone can code something like this.

Krustyy - May 3, 2017, 12:15 pm

Does it work with WPA2 key?

Martarts - September 22, 2017, 7:58 pm

(May 3, 2017 12:15 PM)Krustyy Wrote: [\[CITE\]](#) Does it work with WPA2 key?

Yes it does! Try it out and leave some feedback

tjvrerr - September 22, 2017, 8:20 pm

hi bro i need talk to you , you have skype ? write me

Frater Imperium - September 30, 2017, 6:20 am

Pretty basic tool, but does make things quicker then manually looking.

Nickfreeruns - September 30, 2017, 8:55 am

i have a feeling this is a virus

Mokey78 - September 30, 2017, 2:48 pm

Trojan ? Can anyone verify plesase ?

x.anc.x - September 30, 2017, 8:01 pm

i can conclude that this way only provide you to show the saved wifi in your PC by showing them the password in CMD. i've used this way just to check the wifi that ive forgot. but why dont we just go and use the manual way because its much easier.

if you wish to hack password or something shit like that try to learn hashcat

cookiecutter - September 30, 2017, 8:16 pm

he's probably made a script to echo the commands

netsh wlan show profile

netsh wlan show profile WiFi-name key=clear

Thanks for your work bro, but I don't use that enough to download.

c0mpirate - October 2, 2017, 5:15 pm

old school method to see the passwords stored on our own machine. nice for beginners

Djlaw56 - October 12, 2017, 6:58 am

very nice! and it works just fine too!

sujit1717 - October 14, 2017, 1:46 am

It worked....It shows the Wifi used in a PC..Great work mate!!

Martarts - February 8, 2018, 5:57 pm

Thanks for all of the feedback!
