Thread: [Byte Crypter](#)

SIM-2212192 - May 19, 2015, 10:48 am

Anyone have any experiences with bytecrypter? Thinking of purchasing lifetime so I'd like to ask you guys first. What about Morpheus crypter? Anyone have any experiences with it? How about abyss, litecore, or cyberseal? Thanks! :)

lavic2001 - May 19, 2015, 10:50 am

Morpheus crypter has rly long FUD. my friend using this and he said this is fine.

Cyberseal - encrypted luminosity stub is more than 1MB large so i would not recommended this.

IM using cryptex reborn and i think this is the best crypter in HF :P

EBKJoJo - May 19, 2015, 10:53 am

ill crypt you once for free. if you really need it

(May 19, 2015 10:53 AM)EmeraldRebel Wrote: [\[CITE\]](#) Thanks for the reply, still hoping for more feedback so I can make the best decision. I am currently leaning towards bytecrypter however.

So nobody's owned any of these crypters? Pls post.

i have it its good but like all other cryptes AV like AVG detects it as unknown but over all its really good

#Skyline - May 26, 2015, 6:47 am

Byte Crypter is want you want if you want a reliable crypter for lifetime.

The other crypter is unheard of when it comes to Byte Crypter, 3 years running.
