Thread: [OMC Value API?](#)

SIM-2552982 - May 19, 2015, 12:39 pm

So I am making a little program for myself. Nothing too special, just to practice with python. I was looking for an API for the OMC value. I found one here; <https://omnicha.in/api> , but the website says the `usd_price` is currently disabled.

Does anyone know an API for the USD price that is working right now? Or when will the one from omnicha.in be working again?

Thanks in advance :)

It's just disabled on the getcharts API call. The `getinfo` API call will get you the current exchange rate.

Were you able to get it working with your site/code?

Yes, it is working, however, When other values on that page change, it messes up a little bit. I made a thread about it with an example: <https://hackforums.net/showthread.php?tid=4830908>

That's the only thing, besides that it works great :)
