Thread: [Crypto | Official Group | Searching for Web Developers & Designers | Limited Spots](#)

zSerity - May 19, 2015, 3:46 pm

A unification of sophisticated individuals who share a keen interest in cryptocurrency, currency exchanging, and helping the community of Hack Forums.

As you can tell, this is not the usual general/big recruitment. Crypto is looking for 1-2 talented Web Developers and 1-2 talented Graphics/Web Designers to help us launch our website. Members who wish to join the team will be working closely with other extremely talented front and backend developers. While I won't release much information about the site itself, if you have questions please PM me.

To be quite fair, I added you June 4th to the group, mentioned your name at least 5 times and waited for a response, then kicked you June 7th. Three days should be more than enough time to drop a simple "Hello" or "I'll be active in a few days."

But no hard feelings, we'll work on a different project another day if you're up for it.
