ichsuger - February 1, 2009, 2:32 am

new user - February 1, 2009, 2:36 am

wait i bet hes program just works like reload every..... the youtube view hack just refreshes the page
....
so does the reload every script..... the program he made wuznt that hard.... just make a program
that refreshes the webpage every 1 sec
O.O but just like the program your views will only stay at 213 i've tested it.... this vid had 3 views
and i could only boost it to 213....
so max views that 1 person can give is 210

ok, be careful with that because youtube might delete the video(because of the many continues hits from same IP) Even if they don't they'll block the IP once it hits like 100 or something(not sure about the 100 but something like that)

about that 213 thing, youtube updates the video views instantly until it reaches couple hundred, once it reaches couple hundred it takes 5 to 7 hours to get updated, so wait some hours and see what happens

<http://www.youtube.com/watch?v=UoEgXZNlaHk>

Puffo - February 15, 2010, 5:38 am

No this doesn't use a proxy, all it does is that it views the video.... You will only get views the first 200 times you watch the movie you self or something..Thats why it only works for some... Read the thread for more info...

TheBlackMarket - February 15, 2010, 6:46 am

how many Views per hour ???

-XxxV1r0j4NxxX- - March 4, 2010, 12:54 pm

dude this program fails(hate to say it but it's a fact)for starters it doesn't use any proxies and even though it did it wouldn't matter cause utube no longer uses ips to count views, why do you think programs like tube increaser v2.1 no longer work????This program at best will get you 200 views but thats only if the vid has less than 200 views.

checkout my thread - <https://hackforums.net/showthread.php?tid=298408> to see a real youtube view hack.

People are aware of this program not using any proxys, this has been said in other postes. I don't care about you making a better youtube viewer then mine, tbh i'm glad that you take your time and helps out this forum by letting people use your program... But you have no reason at all to say that my program "fails" and PM'ing me telling me to check out yours... Not to show off, but i'm sure i can make much better program then YOU.

Review

Hello. When i first downloaded this file I thought that it would be a scam to get HF users in a botnet/RAT/Keylogger or any other type of hack you'd like to name. Reason for this is 1.) there is no icon for the file 2.) The user who posted is new and has only a few posts.

So I did do a virus scan with <http://novirusthanks.org> and it found nothing. So I though "eh i'll give it a try". Well tbh I do not see any type of virus in this file as I'm so I'm here to tell you it is safe. Also it does work for Youtube and it goes nonstop. This is a great tool and I recommend it for all youtube users.
