Thread: [Bitcoin Wallet / Balance Checker](#)

EMJAAY - May 20, 2015, 3:35 am

Today I made a program using the Blockchain API. It is just a simple balance checker for your wallet code. Please don't leave stupid comments like "I could of done this in a few minutes" or anything like that. I am extremely new to code and i'm just trying new things out :D ?

[Virus Scan Of The Binary](#)

[The Program Itself \(Compiled\)](#)

[Source Code](#)

Regards,

-Kay ?

<troll>I could do this in a few minutes !</troll>

Thanks for sharing, I'm gonna to check the source ;)

EDIT: Ok, I checked out your program but got an error i.imgur.com/FCn0qXQ.png, you must use try/catch block to avoid this type of errors ;)

Crab - May 20, 2015, 3:50 am

Nice tool. I'll be using this. Keep up the good work. Can't wait to see what other useful applications you come up with.

Never had that error on my end ?

Maybe you don't have .Net Framework installed?

-Kay

u wot m8 - May 20, 2015, 1:23 pm

Nice one Kay :P Might have to use this myself :)

-Kay

wow, obviously he has the framework installed or it would not say too many requests.

Putative - May 20, 2015, 1:24 pm

Thank you for sharing sir!
