Orchid - May 20, 2015, 1:31 pm

Aaron is using a HF members BTC to buy things onsite. He got his private key and stole about 10 btc. He then bought leader of Crypto.

I will post screenshots when I get home from the hospital.

Deany - May 20, 2015, 1:32 pm

This is getting a bit too spooky

The Judge - May 20, 2015, 1:33 pm

I can vouch for this community alert. Orchid has shown me proof beforehand and I must say this is dissapointing.

This really has no direct correlation with Crypto, even though I can see you're trying to make it seem that way.

Orchid messages me once a day asking me to add him to Crypto, and every time I say no, he pull some sort of wierd shinanigans.

Day 1:

This day he started trolling on my Bitcoin help desk, and telling everyone not to listen to the help Crypto members were giving.

Day 2:

This day he spent about an hour trying to convince me to sell my spot if I wasnt going to add him.

Then he starts to tell me that he doesnt want to even be added to the group...

then he starts pulling this shit:

And now to prove that I never stole 9 BTC here is a thread with my ONLY Bitcoin address, I even state in the thread that its my only address:

<https://hackforums.net/showthread.php?tid=4455491>

<https://blockchain.info/address/16VeQg92USUYTiWALVSbqWNvGu6Xjocqa5>

As you can see, I have no transactions for 10 BTC. I only have 13 BTC transacted in total.

And finally, here is a screenshot of my Coinbase account, where I got the BTC to buy leadership.

PM me for a join.me link if you want to confirm that all these images are legit. I remember you logging in with blockchain.

Everyone knows I'm Indian, but I don't have to prove to you that I'm not a loser. There are a lot of people here who knows me in real life ?

Tbh I don't even like talking to ban evading scums/potential scammers/multi accounters like you. So please from now on I'll be ignoring your posts. ?
