Let's me try it bro. Thanks for your effort.

Gee4rce - May 21, 2015, 9:45 am

Nice offer you have there, i just hope that no one misuses this to get into the other folders... you should do backups, just incase.

Anyways, i wen't through DVWA already on a local installation of mine, so no need for me. But i still recommend this to others!

Note: you can switch levels, from 'easy' over 'medium' to 'hard', while hard is meant to be

unbreakable/secure if i remember right.
Greetings, Gee.

I dox members that have over 50 accounts and is constantly scamming HF members. The guy was selling top notch graphic cards for \$18 a unit. He claimed to have connections in china. In reality he just scammed many HF members. He constantly opens new accounts to scam others or try and hack other members.

He told a few personal stories and passed on too much information. The scammer is 100% this guy:

twitter.com/inan_23 ?

you're that person....

lives at : 25228 ALEX CENTER LINE, MI 48015

you scammed many HF members. Using paid accounts. You opened up many to make people think that it's just individuals vouching for you. Yet, it's the same person... you that is using proxies to mask your identity. You keep making new accounts every day...the free kind.

The person I doxed is correct. The kid has multiple accounts...well over 50 accounts ranging from Feb 2014 to May 2015.

You were really butt hurt about it. You left a rep on my account. The source is legit. You're using a proxy in the UK to try and hide.

Yes, ill update the thread adding the link to download and test by yourself, but this is for people who dont want to do that.

Because its offering a free service you dont have to set up on a local host, Its easier i guess.
