Thread: [Mouse_event doesn't want to right click properly](#)

MrRapidz - May 21, 2015, 9:12 am

Hi. I'm having troubles with right clicking with mouse_event

It right clicks fine but it acts like it holds down right click and doesn't let go. Basically the mouse_event(rightclickup) doesn't work properly it seems.

My code:

```
Code mouse_event(rightclickdown, 0, 0, 0, 0)
      System.Threading.Thread.Sleep(50)
      mouse_event(rightclickup, 0, 0, 0, 0)
```

declarements:

```
Code Private Const rightclickdown = 8
      Private Const rightclickup = 10
      Declare Sub mouse_event Lib "user32" Alias "mouse_event" (ByVal dwFlags As Integer, ByVal
dx As Integer, ByVal dy As Integer, ByVal cButtons As Integer, ByVal dwExtraInfo As Integer)
```

Check this - <http://www.homeandlearn.co.uk/NET/nets10p2.html>

It may help you ;)

This has nothing to do with what I'm trying to achieve :P

\$uicidal - May 21, 2015, 10:41 am

```
Code mouse_event(rightclickdown, 0, 0, 0, 1)
      System.Threading.Thread.Sleep(50)
      mouse_event(rightclickup, 0, 0, 0, 1)
Fixed
```

System.Threading.Thread.Sleep(50)
mouse_event(rightclickup, 0, 0, 0, 1)
Fixed
Can you explain what the change does bro? :P

edit: It doesn't work. It still acts like it just holds down right click.

Was it doing the same thing before?

Yeah the fix you sent literally changed nothing

\$uicidal - May 21, 2015, 11:24 am

```
Code mouse_event(&H2, 0, 0, 0, 1)
System.Threading.Thread.Sleep(50)
mouse_event(&H4, 0, 0, 0, 1)Test that, tell me if it left clicks and releases
```

MrRapidz - May 21, 2015, 11:26 am

mouse_event(&H4, 0, 0, 0, 1)Test that, tell me if it left clicks and releases
I do already have the left click working and yeah it releases. Idk why right click doesn't.

Replace the variable names with the actual hex values, and make sure you have the right values

What is the actual hex values for right click?

\$uicidal - May 21, 2015, 11:33 am

I tried searching for a list, but couldn't find one.

```
Private Const rightclickdown = 8
Private Const rightclickup = 10
They're the ones your already had, your issue could be that you're not referencing them as hex values but just numders.
```

```
Private Const rightclickdown as Integer = &H8
Private Const rightclickup As Integer = &H10
```

Private Const rightclickup As Integer = &H10
Lol that fixed it, thanks bro :D
```
