Thread design coming soon to a theater near you

Hello everyone, I will be selling my E-book/Method on satoshimines. This E-book is very simple and explicit. All you need for this E-Book is small investment and can click your way to a millionaire(?). I've been using satoshimines for about 4 months and had time to really experiment a bunch of different strategies. And I can finally say I found a 100% winning method. This method will make your money back in just minutes. Below is some of my earnings a few days ago.

Bought the eBook.

It's a simple method, but this isn't something really new.

It will definitely work, but it will take time.

I'd recommend getting this if you want to gamble some BTC.

Have a nice day! :blackhat

Received a vouch copy, here's my review:

The Method itself is working like a charm. I never saw such a method before, but that's also because this is one of the first satoshimine methods I used. You don't actually need luck for this method, it's pretty safe. OP provided me with 8000 satoshi, got it to 11000 within minutes.
9/10

The Ebook could have been designed some better, but hey, I'm a GFX designer, I look at these things. Though the Ebook is very clear and easy to understand. I didn't look very carefully for any grammar mistakes but it all looked good.
7.5/10

Proof:

I would say it's definitely worth buying, although you need to take some time for it.
