PowerMTA setups costs around \$500 over 256 IPs. Do you think anyone will even buy it? Calling it a tool will be rude lol. Its not shitty AMS. Its a dedicated panel with tons of features.

Also, Mandrill without SPF DKIM and rDNS is shit you can try it out yourself.

So basically it's an web-based tool just like Sendy (<http://sendy.co>) with almost same price tag except it has 'trigger' feature.

Well, I could've bought this if you were offering smtp server with it. Mail Server is the main problem. Nothing is durable in today's email marketing scenario if you want to send bulk unsolicited emails. Gmail blocks virgin IPs if you send 250+/hr no matter how good your MTA setup is. It's getting difficult every day.

Well, if you have a solution, let me know.

ok,actually I dont believe that you and other people who biught this getting 100% Inbox rate. I had worked with mailservers,SMTP,powerMTA ,warming up IP's and so on and its very hard to hit inbox.

Is there any proof that email are landing in inbox and not in spam folder ?

How many emails I could send per day ?

I would buy it for sure, but can i ask. If i buy and send 100k emails, and email will land into spam folder,would you give me refund ,as you said its 100% INBOX RATE.

Does this require SMTP from me?

Is this using built-in php mailer system from server?

If it is using SMTP of your server or PHP Mail system of your server so chances are ip's will get banned very soon and will be start being detected as spammer so will you update ip? even if it is getting banned daily by mail spam detectors?

Nope, its not a cracked shit. I have a lic. and I do legit setups. No you do not need to signup on any trial shit. It doesn't use multiple domains, and I set up the DKIM rDNS and SPF settings myself to attain 100% Inbox rates.

Yes there are feedbacks looks, domain back trace and bounce procession.

Hey Raymond, I visited this thread bcz of the subject line of this thread i. e "100% inbox rate" but after reading the OP I got confused that what actually you are selling??

1. The demo panel is a Interspire email market (can be confirmed by it's favicon), so are you selling (or reselling) Interspire email market or what?

2. Since we need to buy SMTP from third party like Mandrill, SMTP.com so why you need to setup DKIM/Spf etc ??

1. I am providing Email Marketing Solution, a complete setup of the script over Domain + Hosting for lifetime. No, I am not reselling, I have a lic and I can do setups.

2. Buying SMTP from any source doesn't come with inbuilt DKIM SPF and RDNS settings, its done over a domain and SMTP provider. You can google about it, No SMTP Relay servers come with inbuilt settings, they have to be verified and manually setup which I do.

3. The customers pay for a service, a service that Includes setup of the mailer over a Domain + Hosting + Lifetime + DKIM RDNS SPF SETTINGS to achieve 100% Inbox + Lifetime support if they need any. Its a service and I decide how much my customers pay for it.

Please take the further questions to PM.

Will be much appriciated :)

Thanks.

If you read the thread well, probably you do't need to post all this.

Also, Mandrill have a strict mailing policy, please refer google for this statement. Mandrill isn't the only SMTP provider in the market, there are thousand others. I prefer Leadersend, but they are being buggy for now. Also, if you think you can spend \$60 and get Unlimited Mails per day, you are the biggest fool ever.

Then people wouldn't need to pay 500\$ for mailing solutions. You are not related to this field so you would;t understand how mailing works. You can't just get an ULTIMATE THING and begin mailing recklessly. All would be millionaires by now then if it had been that easy.

Also, I am not reselling the script, I have a lic to do so. Setting up a lifetime domain + Lifetime Hosting + Integrating your SMTP with DKIM SPF AND RDNS settings + Lifetime Support and Team Viewer assistance is worth \$60, and its me who decides how much I charge for the service. If you are comfortable buy it or you can find another thing.

Thanks a lot for feedback ?
