So, it says I need to use this QR code to pay, how do I do it? I'm using Bitcoin to pay.

Edit:

I still have a problem.

I accidentally sent \$1.20 more than I was suppose to, is there I can get it back? Should I private message Omni or am I screwed?

And also what is my transaction ID? I want to keep it so if anything bad happens I can use it in the future.

Thanks.

You don't need to use the QR code to pay IIRC. You just need to pay the address with the required amount.

The QR code is just a code for the address you need to send to.

You don't need a QR code for me... Download a QR code reader in your phone and scan it.

I doubt you're going to get that \$1.20 back. It's such a miniscule amount anyways, you should have been more careful during your payment.

Could you do it with Bitcoin though? I don't have Paypal.

You'll get that back. Check your email and there should be one from coinpayments saying you sent to much BTC and to open a support ticket for your refund. Just follow the instructions.

Well, I know this is what happens when buying sales tags with OMC, I assume it's the same with the upgrades. (Correct me if I am wrong.)

I'll see If I can get a refund of \$1.20 BTC.

Update: Support ticket has been made and I know my Transaction ID now, thanks guys.
