The price is already very low

Are you selling hitleap minutes at this price? Cause, I would buy 100k minutes but my current funding doesn't allow for more at this current time otherwise I would take this account off your hands. GLWS if not.

Seems interesting OP but it's so easy to get those many minutes. Just create a bunch of servers running hitleap and you're good to go. But, good luck with your sales!
