Thread: [Problem \(Victims disappear a few seconds after starting the RAT\)](#)

-INVICTUS- - May 24, 2015, 5:01 pm

Hello,

Sorry if my english is not good because I'm french.

When I send my DarkComet RAT (encrypted with Cryptex Reborn) on skype at the victim, when she execute the RAT I can see 5 secondes the victim on Darkcomet and she disappears. If she re run the RAT it does the same things, I can see 5 secondes and she desappears and so on...

I don't now where is my problem, if someone can help me it will be perfect !

Thanks, -INVICTUS-

The problem can be settings in Darkcomet or settings in the crypter.

SourMan - May 24, 2015, 5:04 pm

maybe your crypter is FUD scantime but not run-time.. don't qoute me on that tho

Mr J Smith - May 24, 2015, 5:18 pm

Darkcomet is in-fact unstable for some reason, I thought it wasn't until I started seeing my clients disconnecting, sorry :/

If your file is FUD and you have no port forwarding issues, you should be fine. Double check your firewalls and your port forwarding.

-INVICTUS- - May 24, 2015, 5:25 pm

When I send my RAT Fud at my friend on skype and he run it it work perfectly but when it's a victim 5 secondes after he run the RAT he dissapear on DarkComet.

I use the recommanded settings provided in the folder of the crypter.

it makes me not with all victims
