Thread: [Skill based gambling game](#)

Feanor - May 24, 2015, 5:23 pm

This is my site

<http://golddigginggame.com>

Digging for gold is easy -- and you can cash in your gold for real cash! When you signup you will find a large MAP of locations that you can dig for gold. Each location has the chance of gold being found. Each time you dig it 'costs' you 'operation credits'. If you successfully find gold then you will receive additional operation credits to continue digging. At the end of the day you can cash out any credits you still have for a CASH payout. You will receive your cash payout in as little as 24 hours -- and since its skilled gaming -- it is not gambling.

Every time you dig additional gold is randomly dropped onto the map -- so you are competing against other players to find the gold the fastest. After each 'DIG' you will be given a color-coded clue that will tell you how much 'gold' is in the surrounding area. This hint will lead you to find the most gold in each area.

This game is based on FAIR digging -- so the odds are in your favor. With each DIG the land owner (our site) receives 10% of the loot -- but all other credits are redistributed to the map which leaves you with GREAT odds of walking away the next Great Gold Miner!

Yeah, I forgot I posted this. It still needs working doing to it. You can sign up without verifying your email account and play for free (so basically any random account) you won't win anything because I've set the settings so you won't while I am working on it. I'm currently trying to integrate it with btc.

theoneman - July 19, 2015, 5:41 am

Cool, I really like the concept currently on 1200+ credits :P

Do you have skype mate? Have a few questions to shoot across to you regarding this!

Can we do this on mobile?

And if so, is it just paypal, or can we use btc?

EDIT: Also, if we get below 5 credits, will they regenerate over time?

Feanor - July 19, 2015, 11:14 am

I agree.

The last modification date was before this thread was ever made, meaning he couldn't have just "added" it after you lost out.

Learn to read.
