Just wanted to follow up on this.

Seedbox is working great! Has boosted my ratio a great deal within the (less than) 24 hours since I had access to it.

[img]http://imagizer.imageshack.us/a/img911/5552/ljSkV1.png[/img]

Super appreciated man, thanks again ?

- One further note, I cant seem to get the RSS feed to download and start torrents automatically, but that appears to be a configuration issue with the site I am a member of (according to their forums its a known problem)

Testing RSS on an open/public tracker though, works like a charm.
