Vouch for Cory™ and his products, legit guy.

Tonight - June 6, 2015, 6:40 pm

I don't think you should misguide the public by saying you can get any username with this tool.

Your customers need to be aware that the tool only works by rapidly trying to claim the username and it won't do anything unless the actual owner decides to change the username on his own free will, and only then, will the tool possibly be able to claim the username before someone else.

I think most people in the oG game know what a Turbo is, this steals a username as soon as someone changes it. ?

How does this work?

Are you able to steal certain usernames when they're changed and you have to wait (months?) until they choose to change their username, or do you have a list of potential usernames you want, or can you steal any username you want even something simple like @Helloor something?
