No you will need to load your proxy list into the bot. You can find proxies really easy just google it.
Also make sure to check the proxies before running the bot.

The bot can do 1 auth per 10 seconds. That's as fast as it can be. Liquidace's version may be 1 second faster but it will waste a ton of proxies because the way it access the site.

(Jun 9, 2015 07:00 PM)ShaflyD Wrote: [\[CITE\]](#) I'm interested in purchasing if you could show me how fast it actually is, slightly concerned by the negative comments.

People who say its slow just don't understand its the proxies they are using the bot can only go as fast as the proxy will load the site. Has nothing to do with the bot. But i'm fixing this proxy issue in V2 as the bot will automatically get new proxies. No more searching for a proxy list just click run and done. The bot will automatically grab new working proxies.

zombiepro1 - June 9, 2015, 8:59 pm

If your scraping proxies for the users automatically and assuming they're all getting it from the same source. Won't only the first person who uses it get the auths?

BotMarket - June 9, 2015, 9:04 pm

I'm scraping from sites that update every 45 seconds, also you can add your own proxy sources to the bot.

So i would say its a low chance to use the same proxies as a other customer, and if you add your own sites to the bot a even lower chance.

Zenode - June 9, 2015, 10:11 pm

(Jun 9, 2015 10:11 PM)Senderz Wrote: [\[CITE\]](#) Looking forward to v2. Any update when it will come out?

I am testing it now and just making some little tweaks. Should be done tonight or tomorrow.

BotMarket - June 11, 2015, 10:28 pm

Ok after testing V2 all day its done. There has been tons of new issues as the ikovps site has added

cloudflare blocking a ton of proxies, then most public proxy sites have been used already. But the proxies have only been used on the non captcha vote. So what i have done for V2 is made the bot scrape for proxies then check them, then use them on a vote that uses captcha. So for V2 you will need a Death By Captcha account. It's very cheap you can buy 5,000 captcha's for \$6. So 5,000 Auth Codes for \$6.

Even know the bot still can not get 1000 Auth Codes in 2 mins, the best part is it can run 24/7 you never need to load in more proxies. It's totally hit or miss on how many Auth Codes you will get per hour as it depends on what proxies the bot gets. Sometimes it will get 5 in 5 mins and sometimes it will get 5 in 30 mins. You can load your own proxy sites into the bot for it to scrape and that may get you better results.

I am done with this project i have worked the past 3 days straight on it. This is good as it gets guys.

BotMarket - *June 15, 2015, 11:40 am*

I will be posting V2 today if any customers want a upgrade to V2 just send me a pm.
