Thread: [MyBB Plugin?](#)

.Matt - May 26, 2015, 2:25 am

What happened to the MyBB plugin? Months ago it was finished (to the best of my knowledge <https://github.com/Omnicoon-Project/MyBB-Plugin>) yet it still hasn't been released?

Anyone on the team got an update?

Yeah, it was finished, we are just waiting on Omni. It is completely out of our hands now. But it seems he is distracted with new projects all the time, like gauth, server upgrades, trust scan, xmpp, etc ?

It will be the huge boost OMC needs right now, so I really hope something happens in the near future

Can't wait for this to finally be added. Been looking forward to it for ages.

You have to admit that Omniscent has been very productive lately. It must be nice to finally wrap up GAuth and XMPP. I am still a bit curious as to what's going on with this project, though.

I believe Omi will integrate this plugin once he move HF to new powerful server.

Buy More OMC Before Too Late!

Thanks for the info guys. Hopefully we see this addition soon :)

Looking forward to finally seeing this implemented. Soon.

It will be great to see this implemented. I took a few weeks hiatus for school and work and I figured I'd come back to see Omniscent having done a bit related to OMC, and was mildly disappointed that he hadn't. But then when I saw everything else he's done, it reassured me that this is coming soon. The general security and stability of the site will come first, and OMC will quickly follow.

If you have time, day trading for OMC is profitable since the spread is big.

If you have no time, buy some OMC and keep.

This would definitely be a great addition to HF I support.

It's like #4 on my todo list. Likely will do this when HF is on MyBB 1.8x branch.

Just be patient.

Fantastic. It's just good to hear something new on it from the horse himself. ?
