(May 26, 2015 07:50 PM)Ninetales. Wrote: [\[CITE\]](#) Alright. I did receive a vouch copy of the product, and I guess it's time to update my post after trying the method.

My deposit to satoshi mines -

<https://blockchain.info/tx/ac002af4b74d9c0ab6f6711da56bd4371b2e2f14e5af4f0ad0cf703548ab8d95> (This was only 5\$!)

After about 15-20 minutes of toying around with it, I am up roughly 1,500~ "Bits".

This estimates to about \$0.4, though you can easily automate the process described in the method to allow this thing to run overnight.

Your odds of losing money in this are very minimal. In my 20 minutes, I did run across one time where I had to make a risky move, but as described in the guide, it would nearly be impossible for the event to be in the game's favor multiple times in a row.

The precautions that are described as well as given are unique. I have not seen a method such as before, but I cannot say I am big into satoshi mines or discussion around the site.

Unique process, I would definitely put down the 4-5\$ if you're looking for an easily-bottable method, as well as a way to make a small amount of cash with a small amount of cash.

Once again, it is still gambling. The odds might have been with me, though I honestly doubt it with how many CS:GO cases I've opened and yet to receive anything worth more than 5\$.

Best of luck with sales, worth your time and \$.

edit: after running with it a little longer, I've come to the conclusion that the more you invest, the more you will make.

of course, betting is at your own risk, but it seems to work out fairly easily for some. might help you too!

edit2: okay. last edit; here's some tips for when you get a go with this.

- don't be fucking greedy, you'll screw yourself over and in the long run that extra amount doesn't look as cool anymore.
- don't pussy out. there's a .000064/100 chance you'll lose all your money. although, it happens.
- listen to some damn music. i'm making like .0002 per 2 seconds which is not entertaining without tunes. be ready to waste time and jam out.

I personally haven't seen this method before, I wanted to give it a try.

OP provides in details on how to earn money with his method which works 99% of the time, it is gambling method. I made an investment to try it out! So,

Investment URL proof (\$2-3)

If you donate the same amount as me you will get around 8000 bits.

These are my results after few minutes:

That's right, I made twice of the amount I deposited.

In other words, this method is simple, cheap and worth that \$5 which is nothing. You can make your money back in no-time. The output is docx (not .pdf), so don't expect any fancy images etc.

OP also provides VIDEO PROOF which is good. (Included in the method).

His eBook is quite understandable and easy to do.

Also, OP provides support which is an extra bonus if you need help!

Good luck with your sales mate!

Huge vouch for Partly Cloudy! I bought his method and have already earned ~\$7 in just 15 minutes! Here are screenshots for proof. You can see in the first screenshot that I paid \$4.00 in BTC for this ebook and then deposited \$28.94 into Satoshi Mines which is equal to about 0.12 BTC. And then just after 15 minutes of playing I am ready to cashout 0.150632 BTC which is equal to about \$36! And this was all made in just 15 minutes! If I times this by 4 it's how much I could be making in an hour with this method. \$7 x 4 = \$28/hour!

Screenshots:

Spoiler ([Click to View](#))

EDIT:

I won so fast and was ready to cash out so quickly that I had to wait for my deposit to get 3 confirmations before Satoshi Mines would let me withdraw. ? Here is a screenshot of all three transactions next to each other for even more proof:

Deposited 24\$,

Roughly 101K bits.

Played around a bit, then I started to take a record.

After 10 minutes, I made roughly 3K bits with a 25\$ deposit. That's about 70 cents. Do this about 30 times and you've doubled your investment.

$30 \times 10 = 300 / 60 = 5$. I can make my money back within 5 hours of purchase. Of course it would be a little tedious, but it's better to be stable then just throw your money and lose it all.

I lost 10 base bets, and never lost any "level 2" bets(explained in the method). Which means you will lose roughly 1 bet a minute. Follow the strategy provided, and you'll be a-okay.

Withdrawal for those who don't believe me:

I see you trashing or attempting to trash just about every ebook thread in existence. Lay off, will you? The strategy isn't made to make you millions, it's made to help you increase the amount you invest. Sure, if you invested thousands you might be able to make millions, but how many people have that much money to spend? Plus this is something that isn't patchable or oversaturable, it's a strategy, so why not sell it for \$5? you can get them paid back to BTC and then exchange BTC to pp or sell BTC to Bank directly on
coinbase

Probably one of the best methods for getting a good ROI. If you play the odds and take it slow, you won't go broke. Unless your really, really, really unlucky.

Hi;

- I have test many method. (with lajci bot)

- 1- It's bad to read this ebook that not ergonomic reading.
- 2- I read it like 5-6 times for understand but every setting ill try with this ebook is boring and not the best for earning
- 3- I can vouch for this method because it's a nice method but i didnt recommend it if you want to really earn.
- 4- The seller treat me like a little shit.

You can make 5000-10000 with this method but you can loose too much for the win.

Begin from 40k to 100k in 5hours (bot personnal setting)

Begin from 20k to 42k on cellphone when im on train. (with ebook method)
