Thread: [ProtonMail, Encrypted Swiss-Based E-mail. End To End Encryption E-mail.](#)

Pulser - May 26, 2015, 10:01 pm

I just recently signed up for ProtonMail and I got to say it's really cool.

For those of you who haven't heard of it, it's an e-mail service created a couple years ago at CERN(the nuclear research facility with the big particle accelerator.)

They encrypt your login as well as your mailbox. It's all done client-side and ProtonMail only stores encrypted credential, meaning password recovery isn't possible. But it also means your mailbox and passwords aren't subject to release upon a court order.

PM is hosted in the Swiss Alps at a military command center and e-mails can be set for self destruct. I recently sent an e-mail from PM to my Hotmail and I couldn't even pull an IP address from the message source. It's really cool.

Anyway, I know a lot of you guys are looking for anonymity and I thought I would toss this service out there. It is REALLY good.

Here is some more information about the service. As a believer in anonymity and security I highly recommend this service.

Code No advertisers.

No governments.

No third parties.

Only you have access to your inbox - this means no advertisers, governments, or third parties gaining access to your data. With ProtonMail, you can ensure private communications stay private.

Code Anonymity

No email or phone number required to create your account. No IP logs which can be tied to your username. We respect your right to privacy.

Why did you remake this thread?

Pulser - May 26, 2015, 10:08 pm

(May 26, 2015 10:04 PM)Sh1eld Wrote: [\[CITE\]](#) Why did you remake this thread?

I junked my original thread a while ago because I posted it in "beginners hacking". Seeing as this isn't related to hacking I was under the assumption I posted in the wrong section.

I figured it would be better served to the community in the lounge. Sorry if I was wrong. ?

Hmm isn't this email service invite only though? Or am I confusing it for something else?

Pulser - May 26, 2015, 10:12 pm

It isn't invite only. You just have to wait to be accepted since they get so many signup requests.

Summit1g - May 26, 2015, 11:09 pm

Signed up for this. Thanks Mister. :^)

Stoned AF - May 26, 2015, 11:54 pm

Signed up as well. Thanks for the share, looks legit.

L9S3S - May 27, 2015, 3:09 am

Just a heads up, the waiting time can vary from a few days to a few months.

My signup took about a week.

Thanks for the tip.

?

vendettalogzz - June 9, 2015, 11:31 am

Just signed up also, thanks for sharing

alibomax - July 22, 2015, 1:21 am

i need a mail that can mask th reply-to. so that after clonning the senders email when they click reply the reply to will show same as senders email but delivers to my email ...can some one help with this? PM me

~Jay~ - July 22, 2015, 1:53 am

I signed up for an invitation about a week ago still waiting to get it.

r3nhoax - July 22, 2015, 1:58 am

Best thing is no IP logging feature :)

Champ?on - July 22, 2015, 1:58 am

Just claimed a OG email. Omg. Fresh as fuck. Might claim 3 more.

Orange4829 - July 22, 2015, 2:01 am

Just waiting for my invite now, sounds awesome.

Brendan - July 22, 2015, 2:57 am

Have had one of these since Late January, only thing I hate is having to type in the pass to unencrypt my inbox.

Mainly because it fucks with my speed dial image.

Sirius Black - July 22, 2015, 2:59 am

A friend of mine hacked Protonmail, allowing him to see IP addresses of users etc.

They have fixed the XSS now, but yeah just so you guys know that they aren't an Holy email-provider. (But they are great, I use them too!)

Redwall - July 22, 2015, 3:07 am

Yeah this has been out for some time.

5tax - July 22, 2015, 3:08 am

It looks just awesome, but now I have to wait to get invited because their servers have reached full capacity :(Anyways, thanks for sharing :D

G??gl? - November 3, 2015, 11:42 pm

Thanks for the share, will come in handy :)

ImPerfectPersona - November 4, 2015, 12:28 am

Is it free or naw cause we broke rn, and tbfh if someone "found" us, we'd probably gain more from it than we could lose.
