!cfresolve [URL] - Resolves CloudFlare protected sites

!resolve [SkypeName] - Resolves given name

!info - Displays info about your bot

!spam [SkypeName][Message][Amount] - Max of 500

!isup [URL/IP] - Gets online status of target

!shrink [URL] - Shrinks given URL

!netflix - Generates a NetFlix account

!minecraft - Generates a Minecraft account

!hulu - Generates a Hulu account

!ipinfo [IP/URL] - Gets geolocation information

!users - Gets amount of bot users

!getrank - Gets your rank

!profile [SkypeName] - Gets target's basic info

!email2skype [Email] - Checks an email for a Skype

!ip2skype [IP] - Checks an IP for a Skype account

!scanports [IP/URL] - Scans the target for open ports

I would love to hear your suggestions!

If you like the bot and would like to host it yourself you can purchase the panel [here](#)
