HERE ARE ALL MY CRITIQUES

1. the background is alright but I can tell there was nearly no editing done to it. Darkening the background would be better for the text
2. The title should be in white
3. I dislike the font try Open Sans
4. The middle text is so squished and small it can't be read. The middle part should be white as well
5. Remove the drop shadow on the 'basic' and 'premium' titles
6. Bottom part should be smaller

the Basic Thing "your Header" must be good, change "account creator" font and color, and remove those unnecessary lines from it,

Miidle text "choose plan" change color and font , make it big. Remove lines.

By just this 2 it will make it look lot better

Personally i'd use a completely different font for headers / titles like Mohave or Comic sans. Maybe reduce the opacity on the overlay on the image too.

I'd also suggest making this a lot bigger than just one section.
Include info about the product, what it includes, what it doesnt etc.
