Requirements:

A CFW PS3

[Download Here](#)

It is a PKG File, install it using any method you want. (For CFW)

Controls:

"Start" to start the game(ingame) and to go to the main menu.

"Select" To Pause.

"L1 or R1" to fly as well as repeat if you crashed .

Enjoy! Credits for this goes to the maker of the game. ?

I have this game, it's a shame it doesn't have a proper splash screen when you die:(
