Thread: [Infection Suite - Encryption/Rar/USB w Source](#)

Dark N3BULA - May 29, 2015, 11:12 am

Whats up guys. Was bored so thought id code something for the HF community especially for people trying to learn VB. So here it is:

Features:

1. Make any Server infectious
2. Rar Infection - Looks for Rar / Zip files in specified folders and infects them
3. Encryption Infection - Encrypts all files in specified folders with a password
4. USB Infection - Pretty self explanatory
5. Multi File Binder
6. Icon Injection
7. Assembly Cloner
8. Codedom Compiler

If you encounter any bugs or have any questions please feel free to drop a line to my pm alternatively skype me: darkn3bula

Free to use in your projects (just give credit where its due)

hi, sorry I'm rather new at this, could you post a compiled version for direct use? Thanks

Dark N3BULA - May 29, 2015, 11:19 am

There should be a compiled file in the bin folder.

Found it, it's working great, congratulations. One question: how to decrypt the files? Also a suggestion, make it go into subfolders for encryption too. Thanks

Thanks mat. To decrypt just generate another exe with the radiobox2 checked with the same password and run it.

Thanks

Also I noticed this is currently FUD, do you plan on keeping it this way or is it just because it's a brand new product?

Does this also have EOF?

Yes it is fud at the moment but further obfuscation is definitely possible. EOF is not implemented as yet.

Fantastic

Again hats off to you, this software does exactly what is advertised. Thanks a lot

Thank you for sharing Sexy Guide :) +

Paul Wilson - May 30, 2015, 6:59 pm

Hi, me again sorry.

I found that while it works fine on both my computers, it does not appear to work on any other PCs I run it on. Both of my machines are windows 8. Could you tell me what to do please? Thank you
