Yeah I'm willing to but the problem is with the skids who create an account to get the help they wanted then never open hf again. This is can be really annoying :)

#Skyline - June 9, 2015, 2:09 am

Welcome to HF.

Users do this all the time, it's just up to you to keep on going.

I've hosted a free & paid RAT setup service before, I feel your pain. Just hang in there.

DoggyKong - June 9, 2015, 11:13 am

Thankyou man for helping set up my rat and gave me a test install :P

000100100 - June 9, 2015, 2:11 pm

Best free service I ever used very thorough and helpful thank you for these services. ?

Bobskyllar - June 9, 2015, 2:16 pm

Dude was helping while he wasn't even home ! He got me setup I deff vouch for him. Thanks man !

john.corner143k - June 12, 2015, 2:13 pm

hey i need you to setup my rat .. can you help me..?

TheVBScripter - October 20, 2015, 11:57 am

I got this setup:

RAT (babylon)

VM (virtual box)

Crypter (5/35 usually)

I can create and crypt my server. When I send the stub to my VM (upload & download without distribution) I see the servers running, but I can't see it any slaves. I can only see myself (as slave in the VM) when I don't use my DNS (duckdns).

Long story short:

Could you help me with finding a dns that works, so I can test my project? Thanks in advance ?

Fire_Fire - March 30, 2016, 12:12 am

This Service is available again ;)

Purple Kief - March 30, 2016, 6:05 am

duckDNS should work but is not adviced. You can try both trueDNS and fagDNS. ?

Fire_Fire - March 30, 2016, 7:54 am
