what would the infection rate of blackhole be like now?

Also what exp kits are on the market that would be worth buying?

SWO = doesn't sell to randoms like him

RIG = backdoored + sales paused

Edit: Try either nuclear or magnitude

Or are they all gated communities?

You can buy individual exploits that exploit kits use, most are public but the latest ones with highest rates such as the adobe flashplayer 0day will cost you a pretty penny. RIG is still being sold, it has a good rate, you must use a middleman that can verify to get SWO and black hole is useless now.

PM me if you have any exploit kit available for selling. I can pay with bitcoin

It's still being sold. Look around it's easy to find it.

I believe blackhole is no longer working. You could always try Infinity. If you're willing to send the money
