Thread: [Security+ Information PDF file giveaway question \[REQUESTING HELP\]](#)

Thugnificent - May 30, 2015, 12:03 pm

Hello, I'm new to the forum and I wanted to contribute by giving away a Security Information PDF but had a couple questions that I hope you guys can help me out with.

[1] Where on HF do I post this giveaway?

[2] Where do I upload the PDF file?

I don't want to make any money from this so I want to give hf members direct download link, no surveys, no captchas, no bullshit.

I haven't uploaded any sort of files to the internet in a very long time since I haven't found the need for it so I don't know what to use. I've googled a few but they are all sketchy and require captchas and surveys.

I wouldn't bother doing a giveaway, just go to whatever subsection your information is relevant to and post a link and explain it there. Just upload it to any file hosting site, preferably one that has a pdf preview feature.

Oh I see, yeah I'm looking for a site where I can upload the pdf file so that it is able to be viewed via the browser, would you happen to know a site? Thanks for the advice btw.

scribd.com or dropbox both work
