Thread: [Paypal payments disabled?](#)

L0Ki - May 30, 2015, 4:53 pm

Hello HF,

The l33t upgrade page doesn't let me pay via paypal? It says on the upgrade page that HackForums accepts PayPal but there is no option to pay using PayPal.

Thanks for your help.

Then he might have disabled paypal paying in your country.

I'm from US, is it blocked in US?

Hopsin - May 30, 2015, 5:09 pm

@OP US is whitelisted for PP payments

What payment methods are accepted?

We currently accept Bitcoin and Paypal. Please note that only some countries like US, CA, AU, DE, IT, IE, NZ, IN, NL,DK,NO,CH and FR are set to allow Paypal for upgrades. If you are not in one of the listed countries you will only have the option to use Bitcoin. Other options might be available in the future.

No, it's not. As the other users said, try another browser.

I get the coin only option as well, even though I'm from the US.

This is odd. What browser are you using? Have you tried other ones?

Its so simple... when you're filling out your information you have to fill in that you're from the United States, then the Paypal option will pop up.

Oh, that might be the case. I'll look into it A.S.A.P. and if I still have issues I will post again. Thanks everyone for your kind replies.

You have to be a member for at least 2 days and have 10 posts for the option. That and you also have to be in a country that I whitelist to accept PP.
