Don't leak this on HF it's a marketplace not a place to deal crypter with skids.

Edit: I don't say free crypter aren't a good idea but nothing is more useless than give a strong encryption tool to everyone because Antivirus will care of this new method our method is leaked here, and I feel sad that you post this only for rep and "Know how much time it will be FUD"

You know it will be FUD for 8 or 9 Month until a specialist antivirus expert from ESET, Avast, BitDefender.... will come don't think only HQ member are here, there are a lot of snitches.

Hexalogy - June 1, 2015, 3:55 pm

its not working either for me

8, 9 months? Lol it won't.

But big vouch for wardow. Thanks for using the scanwatch

Decay88 - June 2, 2015, 7:34 am

Thank you very much my friend

mrfong - June 2, 2015, 7:41 am

Thanks wardow! checking it own now, it's really appreicated, but i doubt it'll be fud with these 3-4posts people come here then they scan on sites like virustotal

"cannot find upx.exe"

WOW!

LifeOwner - June 2, 2015, 9:28 pm

i have tha same error with the other guys...i run the upx from this link but nothing works....

'Cynical - June 2, 2015, 9:58 pm

The crypter is detected as a virus by Windows Defender.. Couldn't download it....

Guess it's not FUD, anymore? Lol.

Wardow - June 3, 2015, 2:02 am

Just download Aut2Exe & disable UPX Compression, and crypt using the crypter, and it's RESOLVED !

Updated the crypter for avoiding this error...

it stands for scan results which got posted last month. You know how fast free crypters can be saturated.

The crypter is currently still FUD, the file just got detected, but the crypter got USG and i just scanned and it's FUD !

pauliux963 - June 14, 2015, 11:17 am

The crypter stops responding when trying to crypt. Any help?

Kilikian_Arch - June 14, 2015, 12:17 pm

thanks for this, you should release it with a password that must be decoded

good result
3/15

avast, kaspersky, forticlient scanned on non-distributing website refud . me
the detection could be caused by the icon that i used

Armada - June 14, 2015, 12:27 pm

Gonna take a look now bro.

If this works as stated, this shall be awesome, thanks for the share!

Kilikian_Arch - June 14, 2015, 12:45 pm

ok after removing the icon i got 1/35 detection ratio , detected by Avast

great result for a free crypter, i hope people wont scan it on sample distributing websites

mistergaza - June 20, 2015, 3:57 am

free crypter with fud? wow cant wait to check it out first

Kennyrouffe - June 20, 2015, 4:29 am

So, I downloaded this, ran it and encrypted my DarkComet Spy RAT, checked properties and this is inside.

Did the encrypter change this, or is the rat usually called "ProcessHacker.exe" after being encrypted. I did not call it ProcessHacker.exe, the "original" file name. Or is that the original name for RATs before the name was changed in the stub creator.

JustSomeN00B - November 18, 2015, 6:23 pm

Works well. It gets DarkComet past Malwarebytes in scantime and runtime. Definitely a good crypter, hopefully it stays that way.

EDIT: Nevermind, Failed the heuristic analysis.

that's fine. Just click OK then select the out.aut (or whatever it's called) file in the program that opens and set the destination then click the convert button and wait for it to finish.
