Thread: [Programming Lessons - Affordable and Enjoyable](#)

J033 - May 31, 2015, 11:08 am

Hello, and welcome to my thread designated to Programming Lessons. If users show active interest in this type of service, I will get a gorgeous thread up and going. But for now, I'm going to keep it simple. :)

Service Offerings:

One-On-One lessons over TeamViewer or Skype.

Group lessons via Skype, offered at a discounted rate (2 or more students).

Optional "homework" projects to advance more quickly outside of lessons.

Free support outside of lessons to answer questions related to the lessons I have taught.

Lessons:

Lessons will usually be completed over TeamViewer or Skype. Depending on current student experience with programming, lessons will be adjusted accordingly.

I have a custom curriculum that I created, so lessons do not end at specific times, they end once the lesson material has been covered and no questions remain. However, it can be expected for lessons to last between one and two hours.

I offer complete beginner lessons, and I tend to start with Java for these lessons. Python is also considered for students, we can determine which is best for each individual.

For each lesson, I will teach the curriculum for that lesson, then provide optional "homework" projects to practice outside of the lesson.

After purchasing a lesson, I will offer free support via Skype outside of the lesson to each student.

Pricing:

One-On-One lessons typically start around \$15 for a lesson. (This will include optional "homework" projects and free Skype support.)

Group lessons will receive discounts depending on the number of students.

I can Vouch for OP, really good at his stuff.

?ovu - May 31, 2015, 5:59 pm

GLWS OP; however you do not mention the length of each lesson. I assume they're about an hour each, but make sure to specify the length of each lesson. HMU if you need another teacher to help you.

J033 - May 31, 2015, 8:15 pm

Ah, yes, thank you for pointing that out! You are correct, lessons will typically last between 1.5 - 2 hours. Since I will follow my custom curriculum and not a set time, it will vary depending on the student. But thank you for reminding me to add that in the thread. :)

I will definitely get in contact with you if I need any extra help in the case that many people are interested. Thank you. :)

1MPERATOR - June 1, 2015, 9:09 am

A whole different question: are you also able to make something instead of learn? ?

If yes, please PM me.

J033 - June 1, 2015, 11:00 am

(Jun 1, 2015 09:09 AM)1MPERATOR Wrote: [\[CITE\]](#) A whole different question: are you also able to make something instead of learn? ?

If yes, please PM me.

Hi, it really depends on the situation. I am not currently too interested in large projects. For some small projects, if the pay is right, then sure. But this service is more aimed towards helping others learn. Thanks. :)

@OP says in the thread that lessons will be between 1 and 2 hours

Vouch for this service, OP knows what he is talking about - Good luck with sales @OP

I didn't edit the thread til after the suggestion to add the time. :) Completely forgot about that, haha.

Thank you for the kind words! Hopefully looking to take on a couple of student in the next couple of days. :)

Oliver Sykes - June 1, 2015, 5:55 pm

If only I'd seen this before choosing a language. Oh well, good luck with this OP. I hope to see this with other languages. I was surprised when it didn't exist when I was starting VB.

J033 - June 1, 2015, 6:00 pm

You still have time to switch! It's never a bad thing to know too many languages. :) Having a bit of experience in VB will also help you learn the new language easier. If you want to talk a bit more about the lessons, feel free to ask any questions, or PM me, or add me on Skype. :)

Thank you for your interest!

Ahh right, I didn't notice that - sorry :o

But I hope this all goes well for you :) seems promising so far

No worries, I appreciate your concern!

Thanks! Not too many people have contacted me with interest so far, so I still have a bunch of slots open for anybody that might want to take up some lessons! :)

J033 - June 3, 2015, 6:04 pm

Hello everybody! For the next hour, I am offering two lessons for a total of \$20. That is only \$10 per lesson! Please contact me on Skype (iAmJ033) or via PM if you are interested!

NOTE: Lessons CAN be redeemed in the future. If you purchase lessons during this deal, we do not have to do lessons tonight. We can work out a time that works best for you.

I've had a couple of people interested so far, and hope this sale gets some more students interested. Thanks!

Edit: The sale has ended, but I am still offering these services! Please get in contact with me if you are interested. :) 10% discount for purchasing 2 or more lessons at a time!

Man Bear Pig - June 5, 2015, 3:43 am

Currently brought three lessons. I've done one so far and it was quite good. Will update this post when I've completed all three lessons.

J033 - June 7, 2015, 8:48 am

Hey, thanks for the comment! Lessons with this user have gone great, Man Bear Pig is an excellent example of a student.

If anybody else would want to learn more about lessons, feel free to contact me! I have some time slots available for students in different time zones! :)

equator - *June 9, 2015, 8:28 pm*

I am interested, added on skype!

J033 - *July 9, 2015, 10:52 am*

Hey, guys. I have been busy with offline events recently, but I am back and still providing lessons. Please contact me if you are interested. :)

MrAlex - *July 10, 2015, 8:55 pm*

What programming languages to you teach? Other than Python and Java.
