Thread: [A free SMTP bomber source code with bin | SMS Email Addresses included](#)

Nicholai - May 31, 2015, 11:51 am

This is dedicated to my thread here: <https://hackforums.net/showthread.php?tid=4722755>

I made this thread to prevent people from buying applications that takes less than 15 minutes to make.

This applications works just like any other "SMS bomber" here on Hackforums, no need to buy one.

This will be taken as a giveaway since I am going to release a PHP/HTML version of this as well.

Below I provide you the bin(Executable) and the full source code with a GUI.

Gmail is not always happy for 3rd party applications, therefor I would recommend going to <https://www.google.com/settings/security/lesssecureapps> and disable the security for 3rd party applications. If you don't trust the bin, feel free to compile the bin by yourself.

Bin:

Quote:Download:

<https://mega.co.nz/#!pFZj1bTZ!z6Eg-OWmT4Dg2xLxuRn5fmaBdQs8-vhgTnz2Y8SW2hU>

Screenshot:

Spoiler [\(Click to View\)](#)

Source Code:

Quote:Download:

<https://mega.co.nz/#!EQaimRy!u3-mZxXLs0fp4-0zvrzd8QkHneCqZ6EPmkLBa-eNzwE>

VirusTotal: No need for that, there is only plain source code.

List of Email destinations for SMS texting - This is EXACTLY what the paid SMS bombers is providing you, don't get fooled.

Ripmark - May 31, 2015, 12:02 pm

Sounds OG, i'll check it out later..

What people are charging money for, usually ain't worth it.. Keep in mind guys, some people will do everything for money..

Nicholai - May 31, 2015, 12:15 pm

Just updated the thread, accidentally put my own email in as the destination email. It's now fixed. Enjoy!

DuguWudi - May 31, 2015, 12:20 pm

That would have been a mess since it was set in the source code.. I'm glad that I could contribute with it, enjoy! :)

DuguWudi - May 31, 2015, 12:22 pm

(May 31, 2015 12:20 PM)Danmark Wrote: [\[CITE\]](#) Still got a copy, pm me ;)Nah, I'll pass, OP already given the program and source code, no point bombing his email too.?

TBH, I'm not bombing anyone with it, maybe bomb my own email for fun.?

You should leave a disclaimer saying something like "I'm not responsible for anything that may happen as this is only for educational purposes"

Nicholai - June 1, 2015, 6:41 am

(Jun 1, 2015 06:26 AM)bass booster Wrote: [\[CITE\]](#) You should leave a disclaimer saying something like "I'm not responsible for anything that may happen as this is only for educational purposes"

I was thinking about that as well, I will update the thread soon.

WhosYourDaddy - June 1, 2015, 6:46 am

Can i have this mate

Please send me a copy

Here is the download with a VirusTotal scan included.

CJamie - June 1, 2015, 8:32 am

Thanks for tool man. I already got a few others like this only, just change in the interface. Anyway, thanks for the share!

ciocan - June 1, 2015, 3:02 pm

Nice giveaway, direct link no need for PM ?

I never use bombers. I notice that it require to login... In what account do i need to login?

Mcbride - June 1, 2015, 3:29 pm

I'll download this soon as I get back on my PC. Thank you OP. Can I please PM you if I have questions?

Nicholai - June 1, 2015, 4:40 pm

Of course! Feel free to send a PM.

--

Ciocan - You can create a new gmail account and use that, remember to disable the security, the link is in the thread :)

Kazz - June 1, 2015, 5:16 pm

Great tool. Works flawlessly. Messing with it on myself. Almost was going to pay for something similar. thanks!

Nicholai - June 1, 2015, 5:20 pm

From what i recall gmail is limited to 200 or 500 mails per day. Anyway the point is that i cant send unlimited mails from one account. Do i miss something?

Nicholai - June 2, 2015, 4:26 am

(Jun 2, 2015 01:25 AM)ciocan Wrote: [\[CITE\]](#) From what i recall gmail is limited to 200 or 500 mails per day. Anyway the point is that i cant send unlimited mails from one account. Do i miss something?

I'm not sure about that limit, you could always create more accounts.

The PHP version makes it possible to send an unlimited amount, all depending on your web host.

ciocan - June 2, 2015, 9:57 am

I get the picture. All depends form the host... This software dont serve my needs. Thanks anyway for the great giveaway.

Nicholai - June 2, 2015, 11:40 am

(Jun 2, 2015 09:57 AM)ciocan Wrote: [\[CITE\]](#) I get the picture. All depends form the host... This software dont serve my needs. Thanks anyway for the great giveaway.

I'm currently developing my web cracker so I'm a bit busy, I will slowly begin on the PHP version of this. I will provide some hosts that allows spamming as well.

Barack Jong-Unbama - June 8, 2015, 1:03 am

Thank you for sharing another great and usefull tool.

You're saving a lot HF members from getting "scammed" by all theese SMTP bombers on the market.

I've seen a lot of bombers recently and more seems to come, let's hope this free tool will decrease

the amount of bombers on the market and save people for money.

Nicholai - *June 8, 2015, 8:24 am*

(Jun 8, 2015 01:03 AM)Really? Wrote: [\[CITE\]](#) Thank you for sharing another great and usefull tool. You're saving a lot HF members from getting "scammed" by all theese SMTP bombers on the market.

I've seen a lot of bombers recently and more seems to come, let's hope this free tool will decrease the amount of bombers on the market and save people for money.

Hopefully it will stop soon, it hurts to see people wasting money on something that they could've done 100x cheaper.

--

Updated the thread with a list of carriers.

jackehis - *March 13, 2018, 5:16 pm*

where can i d=find the link for the download
