Thread: [Hey Guys, NewBe wit many Questions](#)

toxic0815 - June 2, 2015, 6:19 am

Hello Guys,

i am new to this site :-)) I have a few questions to new. Sorry my english is not very good, but i hope you can understand me.

OK, i just found that nice hacking site. When i try to join it with my VPN i cant't join that site, why is it? I want to stay anonymous. Its better.

Ok another question, when i google my username toxic0815 in the next past days, will i find a link to the forum? Should i better use another username and new email adress to join?

And...i have many Skype contacts, is it possible to hack them and watch the cams? some are paygirls :-)

And i heard about Some Token Generator of Livejasmin or Chaturbate or cam4. But i think they didnt really work, Or can anybody say yes?

Greetz Toxic, dont be angry with me ?

Saad_786 - June 2, 2015, 6:38 am

Wow, some horny kid we have right here.

OP. Check out the RAtIng tutorials, there are plenty. Aside from that. The anonymity questions are entirely up to you.

h3rUx - June 2, 2015, 7:18 am

About your anonimity questions. HF does not allow people to use a VPN or Proxy to connect. You can view the HF rules, its stated in there.

Nomad.Null - June 2, 2015, 7:35 am

Instead of a VPN, change your Default DNS to the public Google DNS for accessing HF. Some ISPs (like mine) do not allow you to connect to HF or other websites with similar content. You cannot connect to HF from a VPN, per their forum policy. You aren't anonymous, but you are better protected...

I'm not going to answer any of your questions because, to be honest, your motives are pretty sleazy and petty. Just pay the strippers if you're that desperate... they work hard to give you a good show.

If you really have any illusions about becoming a great hacker with RATs...forget it. If you want to learn how to do it professionally, you can read my Ebook linked in the image in my signature. Just click on my name to check out my thread.
