I'm not entirely sure why are you saying this ... What does my signature have to do with my coding group i run outside HF on IRC and Cryptocat ?

Yeah sorry lol I paid for GFX. I'm waiting for it

anyway might close it anyway we're full currently counting 35 person. Dev in any languages and in the professional field and hacking field for years. I wish more people on HF would apply guess there's not so much people who want to make money online and do cool stuff together. ?

Being able to crack hashes is knowing how to call a tool, give it arguments and launch it. A thing I'm not going to bother to do as it doesn't show any part of any skillset beyond knowing how to google

Oh ok lol It's okay to think so i guess but you don't know me at all i sold my first VB 6 project at the age of 12 or so, Been into coding and the hacking scene since you were probably not born. I'm not doing a lot of money's from HF Products and not planning too i'm already CEO of an Advertising Company where i live i'm well paid, but i'm a Security Enthusiast and i do enjoy doing SE'ing a lot when i'm not coding or enjoy life with my family or friends. Anyway we can take this in private if you want as it's a public nich fbi forums. ???

SE'ing is dull

is this a marketing group or a coding group?

why take pride in being older? If I saw a kid that knows thrice as me and younger I'd take it harsh also how about you setup coding challenges to apply to a coding group? that'll make a little bit more sense

True but when you're 12 year old you don't start doing some C right away lol. i moved to HTML/CSS/PHP and i made shit load of money currently hired by a company to do their website ... and do have my own one as well where i take jobs contract.

why take pride in being older? If I saw a kid that knows thrice as me and younger I'd take it harsh

Nop i'm taking pride of being older not mean to if i did, what i wanted to say it's trust me i didn't join HF because i wanted to RAT lol I started ratting when the First Back Orifice and Netbus ever been release publicly so i've done my stuff with this.... I still do some time but i can't talk what i'm doing in public ... as it's pure whithat stuff ?

also how about you setup coding challenges to apply to a coding group? that'll make a little bit more sense

Yeah i should make it. But honestly i don't even know if i will recruit. I'll probably make a assignment request and to the one who want to join in. :) Thanks for the idea ?

Viktory - June 17, 2015, 9:17 am

Is that an aer-256 encryption (2nd line)?

Where's the key?

Also why are you calling base64 encodes as hashes? They are completely different.

LoL, did you just -rep me for laughing about your signature being a rat helpdesk?

" Get off my thread and stay in your lounge beginner section. " is what you said.

you even changed that rat helpdesk signature.

You are overestimating your comprehension alot.

sure, -rep me and ill know my place, ill be too scared of my script kiddie(you) reputation score dropping below 0 to come crashing in and destroying your illusion.

Hi im 12 i can code visual basic, im a prodigy. niqqhu pliiis, i was coding arm7tdmi 32 bit asm at your age, get on my level.
