Thread: [\[Help\] Steam Stealer | Spreader for RAT Victims](#)

KaLi-K - June 3, 2015, 11:07 am

Hey guys, im searching for a SteamStealer and an "worm" or something to spread the RAT from the Victims ive alredy got.

Im using Darkcomet and Miner Crypt.
Are there any tools out there thats good for this?

Skype: kalikro
im glad for any help =)

TerminatorHD - June 3, 2015, 11:09 am

i dont think steam stealing is possible anymore due to how you need to comfirm every trade on email now

KaLi-K - June 3, 2015, 11:12 am

Thats not the Problem, i just need a method to get the Steam Login. (of my RAT victims)
If ive ratted them, i mostly got the email and a pass, but dont got the steam login, thats the problem. :/

Bo Burnham - June 3, 2015, 11:13 am

Don't use DC ;) Use any other free rat except for DC. If you need a clean download for njRAT, check my signature ^^

KaLi-K - June 3, 2015, 11:16 am

I've read something about njRAT and thought it wasnt that good as DC (for me) and wont work with my MinerCrypt.. :/

There was a reason ive choose DC and not njRAT. (but dont know the reason atm, im going to search a bit and maybe ill swap to njRAT) =)

Navigate to the slave's steam installation and grab all files named "ssfn" continued with random numbers, then proceed into the config folder and download the files

"config.vdf"
"steamappdata.vdf"
"loginusers.vdf"
"filterlist.vdf"

Now go to YOUR steam installation and backup your ssfn and the files mentioned above. Then paste them in where they belong

LinkinLinked - June 3, 2015, 11:51 am

I would say that the best way to get steamaccounts is a keylogger binded to for example hacks to steamgames, contact me if you want help

KaLi-K - June 3, 2015, 12:04 pm

@Netation - If i could, i would give u a +rep =)
Thanks m8, this works fine.
