Youtube Spreading | Tips and Tricks | Quick Slaves!!

You will need a FUD Crypter. You will also need a Stable Rat because this could get you 1000 Slaves or More!

Alright so if you want your Video to get alot of Views use alot of Tags and put Alot like 250 Tags in the Comments. This will make your Vid pop up for other People and your Video will get more Views.

Videos you should make to get alot of Downloads are like Clash of Clans Hack,Roblox Hack,Cod Mod Menu,Shit like that. Do stuff that Makes people want the Things. Try doing new Games like Gtav for the Pc. There are a bunch of Dumb people who want to Hack the Gtav Online and these are the People you will want on your Rat Server.

One more thing is when you make your Fake Hack for youtube Make your "HACK" in visual Basic This is good because it will look better because it will make your Video stick out and look more Real!

Sorry That this TuT is Short. Just for New people looking for a Easy way to Spread

To anyone thinking that people are not stupid enough to fall for this, they are. Trust me...

Also nice tut for begginers OP

Yes youtube is a good spreading method, but adding many tags gets your video flagged in no time! Thats why I upload like 20 videos at a time lol...

Aye you forgot, putting "how to boot people offline"

Hacklinx - June 4, 2015, 1:32 am

You should do a fake program and show them how works. In the link put the RAT inside the program.

Regards!

Old, saturated method, all files are checked by malware testers - it will get detected in 1-3 days :/

Nice tutorial, should be helpful to member wanting to learn how to spread on YT.

Diddle - June 4, 2015, 4:42 am

yea true i dont see why people post this.... youtube is more safe now... they will delete video in like 2 days

RANSOMWAR3 - June 4, 2015, 5:05 am

i think you forgot to make a tutorial how to make fake hack in visual basic??

I have no idea how to make fake hack in visual basic. (yeh im just a skid.)

Jester1997 - June 4, 2015, 6:25 am

nice, perfectr for beginners like me

G0dl1k3 - June 4, 2015, 12:07 pm

Too bad, that this method is saturated already, 95% of "Hack" Videos are just fake and people are dont trust the videos anymore
