Thread: [\[Janus\] SQLi challenge #15](#)

**JaNuS18** - June 4, 2015, 9:14 am

~ Tasks ~

- display version, nick name, user and database
- make statistics how many pages were added by each day and display list for days with more than two posted pages per day (newer post dates first - see proof picture)

~ Target ~

aHR0cDovL3d3dy5iYW5mZnZveWFnZXJpbm4uY29tL3BhZ2UucGhwP3BhZ2VJRDR0xNDk=  
(Base64 decode it using online decoder like <https://www.base64decode.org/>)

~ Proof ~

[img]<http://img4.hostingpics.net/pics/672870challenge15.jpg>[/img]

~ Rules ~

- use union select with pure DIOS (no group\_concat, no substring\_index, no flow control functions)
- command count() may be used only once in your syntax (repeated count() with limit is not allowed as you brake last rule)
- for statistics use only table columns, no local variables,
- don't ask for hints or solution
- your injection should work without knowing exact dates when each news is posted

Post your syntax to <https://privnote.com> (it is automatically destroyed after reading) and send me link to PM

Let's SQL knowledge be with you ?

~ Solvers ~

Thanks for reporting ?

Target and POC updated.

**Inject0r Killer** - September 9, 2017, 10:53 pm  
This Target Is Also not working ?

**JaNuS18** - September 10, 2017, 4:04 am  
Thanks for your report ?

Sorry, I won't update challenges from 2015 any more.

**Inject0r Killer** - September 10, 2017, 5:33 am  
? Then why dont you post those solutions ? or share those queries in pm plz ?

**JaNuS18** - September 10, 2017, 5:58 am

I don't support copy/paste learning, because:  
Hackbar is full of DIOS syntax named by people who are not original authors

People are using some syntax without understanding it.

On forum you have plenty of copy/paste challenges where people even don't understand what are they displaying in output ?

...

All this because of copy/paste strategy. The best way of learning is by your own experiments.

This challenge tasks can be recreated on any SQLi vulnerable site where you have some news/pages/articles and date when each of them was posted. So tasks are still open, I just don't provide target URL (publicly) any more.

**rawaz karim** - September 10, 2017, 6:29 am  
thx m.r Janus you are right i understand some of them and some i am not understanding  
some query i well try to understanding query know I know join,dios,alias,left  
join,on,in,or,and,benchmark,replace,insert,...etc because of you thx bro
