Thread: [How do i make a VB runtime crypter](#)

SIM-2263037 - June 4, 2015, 3:37 pm

Do anyone know how to make a VB crypter, and can you help me?

Vexane - June 4, 2015, 3:52 pm

HQ.35 characters are going here but you can't see them unless you highlight them :)

How much do you actually know about how a program is executed in memory? If you can't give me more than 2 sentences, it's a sign you don't know about computers in general to even begin working on this.

Understand how programs are executed, understand how antiviruses look inside these executions, then understand how to avoid the antiviruses.

Your first post on this thread was composed out of 2 letters not so good either.
I feel i know about computers, but not enough.

I dont know shit about how programs look inside another program nor how a program(crypter most likely) changes the code of the stub.

That is what i want to learn = Why i made this thread

If i already knew how it worked i wouldn't have made this thread

If you want to know how to make a crypter in VB, then you have first to have some knowledge of VB.
