Thread: [BTC, LTC, OMC MyCode](#)

Omniscient - June 5, 2015, 1:09 pm

Bitcoin: [199yErNFess91VphAfUbSPeyWM5Hitmk4C](#)

LiteCoin: [199yErNFess91VphAfUbSPeyWM5Hitmk4C](#)

[omc]199yErNFess91VphAfUbSPeyWM5Hitmk4C[/omc]

Changed their output to be buttons which I think looks pretty good overall. Did it with the Skype and figured it will work just as well for other MyCode too.

Any comments?

Nas - June 5, 2015, 1:10 pm

webdev77 - June 5, 2015, 1:10 pm

Hover effect is kind of weird because it affects the coin name alone and then the address, but it's okay. I can live with it.

G???????f????s? - June 5, 2015, 1:11 pm

YOOOO That's so fucking sick. Does it work in sigs too?

Obli - June 5, 2015, 1:12 pm

Shit dude, this looks really good. Nice job, nothing I'd change.

Prince™ - June 5, 2015, 1:13 pm

It looks real cool Omni.

Not abuse, just wanted to test it and see.

Kenshi - June 5, 2015, 1:33 pm

Omni delete that black part please...

this : <https://i.gyazo.com/5b8016a15f9e740d40e773d49a6f588b.png>

Lovesosa - June 5, 2015, 1:33 pm

seems cool omi i shud put it in looks awesome

Roger Waters - June 5, 2015, 1:35 pm

The button height and the coin should be the same height.

Omniscient - June 5, 2015, 1:40 pm

Not going to bother. Those are the award images.

FreeAnneFrank - June 5, 2015, 1:41 pm

And how are we going to use these? Code Syntax?

Sorry im noob, please no repfuck

nevermind,

its [btc] [omc] and [ltc]

Hydra - June 5, 2015, 1:47 pm

The icons have a background and I think I know why they do but just in case you'd like to use ones without a background, here you go:

They look really good, especially with my theme :P

Edit: Ah, just saw your post. Well they are there if you want to else nevermind.

Krew - June 5, 2015, 1:52 pm

Very nice. Sad it counts as an image when applying it as signature though :p

iExploits - June 5, 2015, 1:56 pm

(Jun 5, 2015 01:52 PM)Krew Wrote: [\[CITE\]](#) Very nice. Sad it counts as an image when applying it as signature though :p

Really? Damn, I wish it didn't.

But Good job Omni!

Omniscient - June 5, 2015, 2:29 pm

@iHydra

Your images are 5.4k. Mine are 500 bytes.

Your background requires more code than my css with existing bitButton style.

?Average - June 5, 2015, 2:32 pm

Yea, that's what I was thinking, you're aiming for the lowest file size possible. It's just 2 corners, not a big deal. We'll grow used to it.

Gem - June 5, 2015, 3:13 pm

This is really cool! A very nice implementation. Good work Omni

Rep whore 100 - June 5, 2015, 3:16 pm

[testingit](#)

Pretty cool !

Joshz - June 5, 2015, 3:34 pm

I'm not a big fan of this addition tbh, doesn't look nice to me. Just my 2 cents. Enjoy though to all the people who will be using this. Might toss it in my signature if I end up using this signature.

Thierno - June 5, 2015, 3:35 pm

Looks very nice to look at. Awesome stuff

Happeh - June 5, 2015, 3:43 pm

Is clicking the crypto buttons supposed to launch an application or something similar or is it more for aesthetics?

Narrate - June 5, 2015, 3:47 pm

It doesn't seem to do anything right now, it would be cool if when you clicked the buttons it copies the address to the users clipboard.

240sx - June 5, 2015, 3:50 pm

These updates are sick as fuck omni :D

Omniscient - June 5, 2015, 4:04 pm

(Jun 5, 2015 03:43 PM)Happeh Wrote: [\[CITE\]](#) Is clicking the crypto buttons supposed to launch an application or something similar or is it more for aesthetics?

You need the extensions installed on your browser to recognize BTC/LTC links. Normally a desktop wallet client will do it for you like Multibit or Armory.

Happeh - June 5, 2015, 4:06 pm

Comedic - June 5, 2015, 5:10 pm

Wow this is awesome. Nice update!

NiktoKan - June 5, 2015, 6:51 pm

Is that possible change from launching program to copy Bitcoin address when click on it? There are different online and offline wallet. Copy address seems like more useful than launching program.

Omniscient - June 5, 2015, 6:53 pm

(Jun 5, 2015 06:51 PM)NiktoKan Wrote: [\[CITE\]](#) Is that possible change from launching program to copy Bitcoin address when click on it? There are different online and offline wallet. Copy address seems like more useful than launching program.

Just highlight the text and copy normally.

Fish - June 5, 2015, 7:04 pm

they are sexy! i love them. adding it to my sig now :)

edit: cant have 2 images in my sig. can you make it so this wont count as a image? so then i can have an image and this. idk

1btQzXv - June 5, 2015, 7:20 pm

you should have it so that 'bitcoin' redirects you to the official bitcoin page, if anyone isn't aware

Fox™ - June 5, 2015, 9:43 pm

Holy shit, this is fucking awesome.

Alison Wonderland - June 5, 2015, 9:45 pm

this is sick!

Awesome feature IMO

Cameron - June 5, 2015, 9:47 pm

Neat little addition, thanks Omni. :)

Your background requires more code than my css with existing bitButton style.
PNG optimization is a wondrous thing

1,350 bytes (24%)

696 bytes (14%)

1,177 bytes (21%)

Total of 3,223 bytes.

PNG optimization is done by removing non-critical information chunks from the image and a range of other methods.

Comparison ([Click to View](#))

Optimized version of iHydra's image

Original version of iHydra's image

[img]http://x.hackforums.net/uploads/awards/bitcoin.png[/img] HackForum's original version

Omniscient - June 6, 2015, 1:35 pm

Nice job. I can accept a few bytes extra.

I've replaced the images and now just have to wait for cache to clear.

Thanks.

Sir - June 6, 2015, 5:35 pm

Really nifty, this will really make things look cleaner.

Cooligan - June 6, 2015, 11:09 pm

This is awesome.

Great addition Omni.

Mr. WAVES - June 7, 2015, 12:58 am

Nice! When you'll have some time, you could add an exception as image in signature (so I can add all 3 buttons in my signature).

Also, doing the same thing with Spoiler won't be bad.

Nice work

Lucious - June 7, 2015, 4:32 am

Looks pretty good and it fits the theme.

I like it.

'An0ny - June 7, 2015, 6:07 am

(Jun 5, 2015 05:07 PM)xadamxk Wrote: [\[CITE\]](#) Omni, could you make a new spoiler, something like this:

[SpoilerButton=Title] content [/Sb]

^except the click area would look like a button?

Just throwing out the idea, I'm not sure how it would look.

I agree on this one, would be nice to have that. ?

Dan Smith - June 7, 2015, 6:14 am

Looks great! Another cool implementation!

BlueberryAK - June 7, 2015, 6:17 am

It's looking good, Thanks omni

Krueger - June 21, 2015, 10:13 am

I didn't know about this haha nice.

Thanks Omni for this.

Good and great idea.

Sir - June 21, 2015, 11:28 am

Why not include DogeCoin and Dash? Are they just not a popular enough currency?

Brendan - June 21, 2015, 11:34 am

(Jun 5, 2015 01:11 PM)G???????f????s? Wrote: [\[CITE\]](#) YOOOO That's so fucking sick. Does it work in sigs too?

Yes, I've been using it in my sig for a few months.

Djlatino - June 21, 2015, 11:52 am

It's nice, but it counts itself as an image so if you already have an image in your siggy, it won't let you use it.

Krueger - June 21, 2015, 7:28 pm

(Jun 21, 2015 11:52 AM)Djlatino Wrote: [\[CITE\]](#) It's nice, but it counts itself as an image so if you already have an image in your siggy, it won't let you use it.

Yup i know i did post a thread in the Suggestion about 2 images for this purpose but it get it denied.
